Amid Spy Scare

Police Search Files Of Bonn Lawmaker

today searched the offices of a Bundestag member minutes after his immunity had been lifted at a spe-cial session of the West German Parliament that was called because a Romanian defector told the CIA

of spies in high places in Bonn.
Uwe Holtz, the 34-year old Social Democratic member of Parliament, denied reports that he was involved in espionage, denouncing them as "evil suspicions." He said that he would cooperate fully with investigating authorines in an cffort to elear his name.

The Bundestag, called back yesterday from its summer recess for the unprecedented meeting, voted unanimously to strip Mr. Holtz of his immunity so that his office on the 28th floor of the Bundestag office building could be searched. Mr. Holtz, too, raised his hand high to approve the resolution of the Im-

Harnes back. It took only five minutes for the Bundestag to act in what was shaping up as the biggest political scan-ing up as the biggest political scan-dal in Boun since an East German spy was found in the office of for-mer Chancellor Willy Brandt four years ago, prompting Mr. Brandt to

Other Suspects

The Bundestag lifted Mr. Holtz's immunity at the request of the Federal Prosecutor's Office, which was said to be on the trail of other suspects as well. It said only that "some" persons were being investi-

> Government spokesman Armin Gruenewald told reporters today that the investigations of the prosecutor general are based on information relayed by U.S. intelligence agencies to Bonn.

The defection late last month of · Ion Pacepa, 50, who apparently was prominent in the Romanian security apparatus and who was a close friend of President Nicolae Ceausescu, started a hunt for spies in West Germany.

Gen. Pacepa turned himself in to the CIA while on a government trip-to West Germany and was flown to .. the United States.

250,000 Are Expected Anti-Terror Police Ready For Pope's Outdoor Mass

ROME, Sept. 1 (UPI) — Police-today organized anti-terrorist mea-...(11/101) sures for Sunday's inaugural solemn mass to be celebrated by Pope John Paul I in St. Peter's Square VAN Mil before an expected 250,000 per-

sons, including beads of state.

Italian security experts and Vatican's security squads checked the vast square in front of St. Peter's Basilica for possible danger spots and some officials said that 7,000 agents and sharpshooters were being mobilized from Italy's police and armed forces and the Vatican's

Pope John Paul, 65, elected last Saturday in the century's shortest conclave to succeed Pope Paul VI, will inaugurate his pontificate in an austere, open-air mass Sunday

Plans announced for the inauguration made no reference to a coronation rite during the ceremony. Vatican sources have said that the pontiff was relucant to go through with the traditional investiture rite TURN for receiving the pontifical tiara, or o A St | triple crown.

Protest Planned

"torturer" and "bangman."
Vice President Mondale, at the head of the U.S. delegation, will be under surveillance, as will President Elias Sarkis of Lebanon, Chancellor Helmut Schmidt of West Ger-

many, King Juan Carlos of Spain and King Baudouin of Belgium. In the Vatican's paintial Hall of Blessing, the pontiff today joked his way through his first encounter with journalists and gently scolded them for speculating on the political machinations of the secret conclave of cardinals.

"I was amused, before the conclave, reading articles in several newspapers written with good intentions, but amusing nonetheless," he said, nervously trying to center an ill-fitting white skullcap

on his head. "There were no factions. There was nothing like that at all, I assure you," be told about a thousand

The pope then told an anecdote about an Italian editor during the French-Prussian War.

cent, and Bundestag Speaker Karl Karstens, a member of the Christian Democrats, told the Parliament that the lifting of a member's immunity does not imply guilt but merely allows an investigation.

Mr. Holtz, considered a member of the Social Democrate left wing, is a historian and chairman of the

Bundestag Committee for Economie Cooperation, which deals with relations with developing nations. "I have done and am doing my duty as a member of Parliament," be said in a statement before the session began. "I have committed no act, have done nothing at all that could justify the suspicion of espionage or any illegal action."

Defamation Charged

The Social Democrats accused opponents of the government of us-ing the Romanian's defection for an organized campaign of defamation to win votes in coming state elections.

"A particularly questionable aspect of the campaign directed against the Social Democratic Party is the attempt to use the American government in these machinations. This is being done by claiming that the Romanian defector gave the Americans papers or infor-mation that could cast doubt on the reliability and faithfulness to the alliance of the German social democracy," the party's parliamentary bloc said in a statement.

Mr. Brandt, the party chairman, had asked the U.S. Embassy for an official statement on this, according to the remarks.

The West German newspaper Die Welt said yesterday that Gen. Pacepa gave the Americans a confi-dential plan of Egon Bahr, the party's general manager, under which West Germany would leave NATO in return for a Soviet nonaggression guarantee in a first step toward the reunification of Ger-

heart of the story of the church." The two prelates sitting with the pontiff remained stony-faced while the pope, constantly departing from his prepared text, kept the

journalists chuckling. The Curia, the church's administrative body, has not become accustomed to the pontiff's habit of speaking extemporaneously, making jokes and dropping the papal "we" in favor of the first person "I."

Uwe Holtz (left foreground), a member of the West German Parliament who is being investigated for possible involvement in Communist espionage, voted with other deputies yesterday to lift his parliamentary immunity, permitting a police search of his offices. Egon Bahr (foreground right), business manager of the ruling Social Democratic Party, also was reported to have been named as a possible participant in the case, which stemmed from the recent defection of a Romanian official.

In Support of Mutual U.S. Defense Pact

Israel Officials Surprised by Begin Views

TEL AVIV, Sept. 1 — Israeli officials appeared surprised today at a statement made by Prime Minister Menachem Begin yesterday that he would favor a mutual defense trea-ty with the United States if the possibility arises during his term in off-The officials made it clear that

the surprise was not in the concept of such a treaty but in Mr. Begin's reference to it within the context of the forthcoming summit talks at Camp David in the United States.

The talks are to begin next week.

"There's always been talk of this sort of thing, but the working out of this has not gone very far," an artifield said.

because "they are more interested in defending themselves." Mr. Begin made it clear yester-

day that he was not seeking an alliance that would provide for the de-ployment of U.S. forces to defend

"We shall not accept any troops in Judea or Samaria, neither American nor United Nations, because we don't want foreign soldiers to defend our people. We shall defend

Nixon Still Sets

SAN CLEMENTE Calif., Sept 1 (AP) — Despite Australia's advice that a visit would be "inoppor-tune," former President Richard Nixon reportedly is planning to stop there anyway on his forthcommg world trip.

Senior Australian government sources said yesterday that Mr. Nixon had been denied a request to make an official visit to Australia next month and meet with Prime Minister Malcolm Fraser.

But Col. Jack Brennan, Mr.

Nixon's aide, was quoted in today's editions of the San Diego Union as saying that Mr. Nixon has heard from Australian citizens in recent years asking him to visit and that he will make the trip.

Begin used the old terms Judea and Samaria to mean Israel, with Samaria generally referring to the occupied West Bank territories. Mr. Begin said, bowever, that if

Israel is asked to put facilities at the disposal of the United States be itself, would do so.

Softening Seen

JERUSALEM, Sept. 1 (UPI) -Mr. Begin's expression of support for a mutual defense treaty with the United States may signal a soften-ing of the Israeli stance in the Camp David summit, political sources said today. But they added that such a defense pact can only supplement and not replace adequate safeguards for Israel in an eventual Middle East peace.

7 Arabs Arrested

TEL AVIV, Sept. I (UPI) — Authorities announced today the capture of seven suspected Arab guerrillas who, they said, had planned plant explosives aboard a Jerusalem commuter bus last week. The group belonged to the el-Fa-

tah guerrilla organization and is accused of carrying out four sabo-tage attempts, mostly unsuccessful. since December in Jerusalem and in the neighboring West Bank town of Ramallah. Its members banded over to their

captors two primed explosive pack-ets they had intended to plant on a bus last Saturday, an announcement said. They also were reported to bave had a large cache of weapons and explosives.

Israeli Aid Request

JERUSALEM, Sept. 1 (UPI) — Israel submitted to the United States today a \$2.4 billion aid re-quest for fiscal 1979, including \$1.5 billion in military assistance.

A senior treasury official handed the itemized document to the U.S. charge d'affaires, Samuel Hart, and government sources said that Finance Minister Simcha Ehrlich will take it up with U.S. Treasury Secretary Michael Blumenthal later this month.

The Israeli aid request matches the current level of U.S. financial support for the Jewish state. Re-ports from Washington say that the Carter admnistration is seeking to trim it by \$500 million.

Army Controls Rebels' Town In Nicaragua

MATAGALPA, Nicaragua, Sept. t (APt — National guard troops fore aside makeshift harricades today and took control of the city, held five days by youthful rehels whose bloody resistance had become a symbol of the uprising against President Anastasio Somoza.

Dr. Cesar Amador Kuhl, a surgeon working with the Red Cross, said that 50 persons had died in the fighting since it began late last week, including an undetermined number killed in the final push by the national guard. He said that more than 200 were wounded.

Norman Wolfson, Gen. Somo-za's public relations adviser from York, said that the president told him nine soldiers were injured and one was killed yesterday. He said he had no information on

other casualties.
Hundreds of civilians fled the town vesterday morning under a cease-fire negotiated between the rebels and the national guard, Many of the evacuees carried white

Rebels Withdraw

Red Cross workers said that the rebels had withdrawn during the night and that the national guard was in total control,

Most of the harricades, thrown together with sandhags and rocks, had been torn down, a Red Cross spokesman said.

"About 2 a.m. most of the firing stopped and the guard went in with jeeps, armored cars and a front-end loader and began tearing down the barricades," a Red Cross volunteer

An armored car equipped with a 40mm cannon fired repeatedly during the night to dislodge the rebels, a Red Cross worker said

Witnesses said that many of the rebels - large numbers of them teen-agers armed with pistols, rifles and shotguns — had fled into the hills surrounding the city of 40,000, which is 100 miles north of the capital. Managua, Intermittent firing was heard in the hills at mid-morn-

Later today, the armored car was parked at a crossroad. Other armored vehicles prowled different sectors of the city while troops patrolled the streets.

Strike Continues

Anti-government violence had been reported elsewhere in Nicaragua late Thursday, but there were no reports of new fighting in the provinces today. Many shops and businesses continued to observe a general strike called to press demands for Gen. Somoza's resigna-

office in the capital. The national guard, which serves as Nicaragua's 7,500-man army and police force, began their assault Thursday to try to take a national guard garrison that had been held (Continued on Page 2, Col. 4)

More Than Sandi Arabia's

Mexico Says Oil Reserves Might Be World's Largest

natural gas reserves have a poten-tial of 200 hillion harrels, which would give the country the world's largest energy reservoir, even bigger than that of Saudi Arabia.

Speaking to Congress, Mr. Lopez Portillo said proven reserves stand at 20 billion harrels while the probable amount is calculated at 37 billion barrels and the potential is six umes that. Saudi Arabia had been

MEXICO CITY. Sept. 1 (AP) — considered the world leader in President Jose Lopez Portillo said reserves with an estimated 170 billion barrels.

Authorities here said Pemex. Mexico's state petroleum monopoly, has for years been very conserv-ative in evaluating reserves. Early last year it announced t7 biltion harrels in proven reserves at a time foreign industry expens said the figure was closer to t00 hillion barrels, based on drilling and topographical studies.

Mr. Lopez Portillo said that nearly 7,000 square miles along Mexico's coasts and 10 times that offshore are potentially rich in crude oil and natural gas. U.S. government energy planners have long considered Mexico as a

future abundant source of petroleum and natural gas.

Plans by Mexico to sell large guantities of natural gas to the United States have been stalled by failure of U.S. Congress to agree on President Carter's energy bill. Mexico contracted in principle to

sell six American companies about 2 billion cubic feet of natural gas initially to six southwestern states. then follow with sales to California. The Department of Energy refused to approve Mexico's price of \$2.60 per thousand cubic feet because it was higher than the \$2.16 charged by Canada. Mr. Lopez Portillo said Mexico

will use the gas earmarked for the United States domestically in place of crude oil, which it is exporting.

But the president said Mexico will supplement petroleum and natural gas energy with development of hydroelectric, geothermal, nucle-ar and solar resources as well as

He said Mexico will pay special attention to relations with its neighboring countries and will " ask only what we offer: solidarity and respect."

The president said the economic crisis that has plagued Mexico for many decades is ending and a 5 percent growth rate is on the hori-

Singapore, in Midst of Affluence, Worries About 'Going Soft' By Jay Mathews

SINGAPORE (WP) - In this city-state built by monumental risktakers, children are no longer allowed to skateboard in the streets and Boy Scouts interested in night hikes must settle for walking blindfolded at 4 p.m.

Industrious Singapore, once referred to as the "rugged society." seems to be going a bit soft.

With the highest per capita income in Asia outside Japan, with affluent parents having fewer children but higher hopes and greater fears for them, hard jobs and dangerous sports may be losing out.

South Korea and Taiwan," said Finance Minister Hon Sui Sen. "Many people are no longer taking the harder jobs and the high risks."

What I'm afraid of is the hard competition coming from places like

Small Clouds Still, with an economy that has become the centerpiece of rapidly developing Southeast Asia, such fears present little more than small clouds on a far horizon. Prime Minister Lee Kuan Yew, one of the most cautious men in Asia, succumbed recently to what for him was almost euphoria by pronouncing the outlook for the next five years

more than favorable. The island's economic growth rate has been about 8 percent lately. Per capita income is nearly \$3,000, a five-fold increase since 1960. Bitter memories of the 1965 breakaway from the Federation of Malaysia and fears that the predominantly Chinese population of 2.2 million would be attacked by more powerful Malay neighbors seem to have

"We are the owners of this new Singapore." Mr. Lee said in a national-day message in mid-August, "something we never were 20

years ago. Then we were squatters, nearly all of us. The key to most of the progress is Mr. Lee himself. An extraordinarly adept politician, he came to power in 1959 on what appeared to be a socialist platform, then proceeded to turn Singapore into a monument to hard work and capitalism. Since 1968, his People's Action Party has

The government's goal is to impress both Singapore's youth and the rest of the world with the image of a small but feisty nation, looking for more frontiers to conquer.

Lee Knan Yew

captured every single seat in the Singapore Parliament in three separate general elections. Communists and leftist sympathizers are routinely jailed, then released after confessing their sins and promising

Mr. Lee will be 56 on his next birthday, Sept. 16. He stays healthy by pursuing an addiction to golf. He seems to have lots of time to plan for the future, but be prefers to fret often in public about what will come after him and his generation.

"The task now is to insure continuity," he said in the mid-August address. "Able men and women, however intelligent, well-educated

and gifted, bave to be tested, trained and tempered in the hard schools of experience." Too many of the brightest students have chosen careers in engineering and medicine, he said, "Too few took up other disciplines like economics, management, the humanities, law and other professions" needed in running a government, said Mr. Lee, himself a lawyer. He indicated that he plans to change this.

The need to divine Singapore's future has led Mr. Lee into the ticklish area of language reform. Acknowledging Singapore's past as a British colony and its future economic dependence on trade with the English-speaking world, the prime minister has endorsed English as the national language and switched what was the leading Chinese university to instruction in English.

In the meantime, he has launched an energetic campaign to have Chinese parents and television producers curtail use of the South Chinese dialects commonly spoken here. Instead he wants all Chinese, particularly children, to practice the northern dialect known as Mandarin, which is now the national language of both China and Taiwan.

Universal Dialect

Chinese Singaporeans must learn Chinese to preserve their cultural roots. Mr. Lee says. And the Chinese they use should be a universal dialect so that all the different dialect groups in Singapore can communicate with each other and with the 900 million people of China. "If I had listened to my grandmother and continued in a Chinese school. I would bave saved myself thousands of bours poring over my Mandarin and my Hokkien," Mr. Lee said during a television appearance in which he recalled his struggles with Chinese at the beginnings of his political career. "But I went along with my mother. I was sent to an English school."
"When I went down and campaigned in 1961 in Hong Lim. . .

had to speak Hokkien [the principal southern Chinese dialect here] because the majority of them were adult Hokkiens. And the children laughed at me. They thought it was very funny. And it was, probably." Malays, who make up 14 percent of the population, and Indians,

A Directory of First Names

An Artful Dodge in Cairo: Get a Phone Book Listing

friends would never find him in the three-inch-thick volume.

The reason: be had his telephone listing changed from his well-known second name to his littleused first name, Mohammed. The Cairo telephone directory lists subscribers alphabetically by first names, and there are more than 18,000 Mohammeds in the book.

Not only would the girlfriends have to know his first name, but also his second, third and fourth names if they tried to find his new telephone number. He had told them only his second and fourth

The 1977 directory, which is now available to most government offices, many business firms and some influential individuals, contains 1,406 pages and roughly 118,000 telephone numbers. But many Cairo residents say they never use it. Instead, they carry uny leatherbound bookless in their wallets list-ing the numbers of their friends and husiness acquaintances.

'Everyone Is Happy'

The bureaucrat who succeeded in obfuscating his listing explained it this way: "I have a new wife since the last directory came out in 1972. You will understand that there are then I would have to explain to my wife why we are not in the directory. This way everyone is happy."

ry. This way everyone is happy."

Picking up the telephone directory, he thumbed through the 226 pages of Mohammeds until he came to his listing. "See," be cried. "They will never find me."

The Mohammed listings at the control of the control of

The Mohammed listings start with a man whose first two names are Mobammed Yazeed. His number is followed by those of 400 men whose first two names are Mohammed Abu, listed in alpha-betical order according to their third and fourth names. The Mohammed Abus are followed by about 250 Mohammed Ibrahims. (The first letter in the Arabic alphabet is alef, which is transliterated in English as a, i or u.)

CAIRO, Sept. 1 (NYT) — When the Egyptian government started distributing the 1977 Cairo telephone directory this summer, a re- for decades. Even though the father cently married bureaucrat was glee-fully confident that his former lady phone is still listed in the deceased

man's names - all four of them. "Most of my friends now never knew my father, let alone all of his names," the accountant said. "I could tell them his name so they could find my number in the directory, but if I do that I might as well give them the number."

Cairo residents say they do, however, use the slimmer second volume of the directory which lists major government offices, doctors and business firms, if they are able

Cairo, a city of 8 million people, bas about 375,000 telephones. The number of Cairo directories being printed — or why the 1977 directory did not appear until 1978 — is a mystery. The telephone authority, stung by criticism of an outdated telephone system that can make getting a dial tone a two-hour task has ordered its staffers not to talk to any reporters.

Ten years ago, a Cairo photographer moved to a new apartment and took his telephone with him. His name and number are in the 1972 and 1977 directories but the address has never been changed despite his repeated efforts.

"They tell me it is impossible to change it," he sighed. "But for 10 certain people I used to associate with who should not call me now. I bave the influence to keep my name out of the new directory, but the bill to the right address."

"They tell me it is impossible to change it," he sighed. "But for 10 years they have managed to send the bill to the right address."

NEW YORK, Sept. 1 (NYT).— Negotiations to settle New York's three-week newspaper strike were broken off abruptly last night, with the publishers and the pressmen angrily blaming each other for the stalemate.

The spokesman for the publishers. Rupert Murdoch, said that a contract proposal put forward by the pressmen Wednesday was "densory," demanding higher pay, more jobs and shorter bours wahout providing any of the manpower A Cairo accountant also knows cuts that the publishers say they that most of his acquaintances will must have.

By Robert A. Rosenblatt

WASHINGTON, Sept. 1 — President Carter warned yesterday that failure of the Senate to pass the natural-gas bill would be "devastating" for the value of the dollar, in-flation and the U.S. image in the Returning early from his West-

ern vacation to lobby for the bill, Mr. Carter made his appeal to govspecial White House meetings—
the opening round in a campaign
that could be the biggest administration political effort since ratification of the Panama Canal treatpaign by his chief officials, the
bill's fate is in doubt as a result of
the proposition from an unlikely co-

The compromise gas legislation, which would remove U.S. price controls on new natural gas by 1985, is the core of Mr. Carter's energy conservation program.

"If Congress should reject this legislation it would deal a devastat-ing blow to U.S. prestige." Mr. Carter told 100 business executives and Senate staff aides in the White House East Room.

Administration officials said in this connection that the dollar is falling in relation to other currencies partially because of worldwide uncertainty about U.S. energy poli-

cy. They said that passage of the bill would reassure foreign mer chants and bankers, and thus help all to the dollar improve against the Jap-anese yen, the Swiss franc and the West German mark,

World Is Watching

The entire world is lonking to see if we have the national will to deal with energy shortages," the president told 11 governors in a

the opposition from an unlikely co-alition of Senate liberals and con-servatives. They want to strip the bill of its pricing aspect, leaving only a provision that would give Mr. Carter power to allocate gas

supplies in emergencies.

If this effort to send the bill back to the Senate Energy Committee for rewriting fails, the opponents may resort to a filibuster. Because the congressional ses-

sion is nearing an end, a vote to send the bill back to committee would kill it, according to Majority Leader Robert Byrd, D-W.Va. C Los Angeles Times

Singapore Is Prospering, Has Fears of 'Going Soft'

(Continued from Page 1)

who make up 7 percent, must also learn their own languages, Mr. Lee says. But all Singaporeans must learn English to unite the city and insure its access to the high-technology West.

Singapore has achieved prosperity as an ultra-efficient manufactur-

ing, trade and banking center located conveniently near the major sea route between Asia and Europe. Its textile, shoe, plasocs and shipbuilding industries will continue, but leaders like Finance Minister Hon worry about what new trade protection rules in the West and competition from Taiwan and South Korea will do to the island's

Taking advantage of Singapore's highly trained work staff and its fiercely competitive university system, "we want to concentrate on the knowledge part of industry, such as research and development, growth of quality crystals, microprocessing and computer design," Mr. Hos

Limits Ignored

Singapore has excelled by learning to ignore the limits of its tmy population, it minuscule 227 square miles of territory and its vulnerability. This has led Mr. Lee and his closest adviser, Foreign Minister Sinnathamby Rajaratnam, to assume a well-publicized role as the conservative conscience of the nonaligned nations.

Mr. Rajaratnam stood up at the July nonaligned ministerial meeting in Belgrade, for instance, to throw cold water on another lengthy dis-

cussion of how to get more aid from the West. We have become so used to putting the blame for our difficulties on others that we have lost the capacity to take a hard look at our own

shortcomings," be said. "All we can hope for is occasional acts of charity, but no rich nation I know is prepared to undergo great distress and sacrifices to help the poor, no more than poor nations are willing to make sacrifices on behalf of nations poorer than themselves." The government's goal is to impress both Singapore's youth and the

rest of the world with the image of a small but feisty nation, looking for more frontiers to conquer. Government leaders here were pleased when profit-rich Singapore Airlines won worldwide focus with its \$1billion purchase of 19 Boeing jetliners earlier this year. Now they have secured landing rights next year in Los Angeles, and the jets scattered about Singapore's buge, ultramodern airport have been painted with the slogan, "California, Here We Come."

they.

It is published six times a week. Past experience here is that the leverage of U.S. trade, or of indi-vidual U.S. companies, on Soviet political actions is small.

elcome Combination

Most U.S. businessmen in Mos-. cow have supported the Soviet viewthat business should oot be

confused with politics.

Most of them have stuck by that position even after Francis Crawford of the International Harvester. Co. was arrested in June in retaliation for the jailing of two accused

Soviet spies in New Jersey.

Mr. Crawford and the two Russians are free awaiting trial.

The center of the trade dispute in Washington is the proposed sale of a \$144 million plant to the Soviet Union to produce hard-metal oil drill bits, which it needs to exploit reserves of petroleum in Siberia. Dresser Industries of Dallas received an export license after the deal was reached in June, and both the State and Commerce departments have approved the deal.

But after the Soviet Union put prominent Soviet dissidents on trial this summer, President Carter decided to demonstrate official displeasure by stopping high-level po-litical visits to Moscow and by reviewing trade relations. He canceled the sale of a Sperry-Rand computer to Tass, but after a review he let the oil-hit deal go through.

Protests from such influential congressional figures as Sen. Henry Jackson, D-Wash., and studies made under the auspices of the Defeated fense Department have put the contract in doubt again. Aides of the president's national security adviser, Zbigniew Brzezinski, have argued that the Russians could use the technology to produce oil in strategically significant quantities, and the U.S. Army has argued that the technology to produce oil in MOSCOW, Sept. 1 (AP) — U.S. for \$8,500, almost four times the technology to produce oil in MOSCOW, Sept. 1 (AP) — U.S. for \$8,500, almost four times the twinescent quantities, and the U.S. Army has argued that who contends that he is "a pawn in tunescent arbide know how could a political charge game "cold today."

He said he will be represented in the said he will b tungsten-carbide know-how could be turned to making armor-pierc-

Sen. Jackson co-sponsored an amendment to the Trade Act of 1974, which made improved U.S. trade and credit terms to the Soviet Union conditional upon a liberalization of Soviet emigranion policies. The aim then was to pressure the Russians into letting more Jews emigrate to Israel.

The result was that the Soviet Union canceled the 1972 trade agreement with Washington. It reduced emigration of Soviet Jews

Seabrook Foes Get Jail Term

HAMPTON, N.H., Sept. 1 (UPI) Eleven persons were convicted yesterday of criminal trespass at the Seabrook ouclear power plant, fined \$100 and given 30-day jail

All said that they would appeal the sentences, handed down by Hampton District Court Judge Al-fred Cassasa, and all were released on personal recognizance. Six of the defendents chained themselves to a crane oo the construction site Ang. I and the other five were ar-rested on the facility's access road.

Czechoslovak in Lagos

LAGOS, Nigeria, Sept. 1 (UPI) Czechoslovak Foreign Minister Bohuslav Chnoupek conferred with Head of State Olusegun Obasanjo and External Affairs Commissioner Henry Adefope today, after arriving from Angola last night. Mr. Chnoupek is to stay till Sunday.

By Craig Whitney MOSCOW (NYT) - While the from 35,000 in 1973 to 13,459 in 1975. Possibly 22,000 will be allowed to leave this year.

Io the interim. U.S.-Soviet trade has stagnated, except for agricul-tural exports of U.S. wheat, soy-beans, and feed grains. Last year the Uoited States sold only about \$500 million of sophisticated industrial technology to the Soviet Union, and in the first five months of this year it has sold only \$228.6 millioo worth.

"The U.S.S.R. has in recent years been successfully developing busi-ness relations with such Western eountries as West Germany, France. Italy, Japan and others."
Sovietskaya Rossia wrote. "The United States is not among them." Oil-drilling technology is apparently best developed in the United

But one oil executive here said: "The Soviets have their own hard-metal technology — they can make the drill hits themselves if they have

The administration's attempt to get the West European allies to agree not to sell a computer to Tass met with something less than suc-cess. "In case of oeed," said Anatoly Kovalyov, a deputy foreign minister, "we can find other partners who are reliable enough."

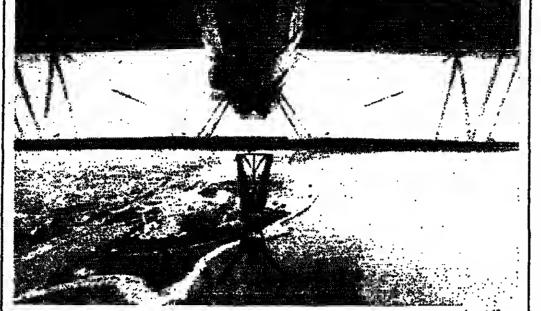

The Soviet government seems to be confident that it can exploit the diversity of interests and the competitioo inherent in capitalism to its own advantage in other ways.

After Mr. Crawford was brutally hauled out of his car and taken to prison, the company withdrew from all its projects under way here pending Mr. Crawford's release and asked 21 other firms doing husiness here for support. But oo other company has followed suit. Armand Hammer, chief of Occi-

dental Petroleum Corp., arrived in the Soviet Unioo last week to inaugurate a fertilizer terminal in Odessa, and the Soviet news media pointedly gave wide coverage to his visit and his pleas for increased Soviet-U.S. trade.

So far, the Russians seem to treat

the U.S. trade threat with con-tempt. The United States probably could make the threat credible by cutting off trade in grain, which has amounted to more than \$1 billion so far this year. But the countries have a five-year agreement on grain trade, and U.S. farmers would hardly be pleased with the surplus that such an embargo would pro-

WING-WALKING — Bob Oates reaches for the sky, so to speak, over the Toronto waterfront during practice for his wing-walking daredevil act at an air show this weekend. Plane flew upside down while pilot Joe Hughes triggered a remote-control camera on the tail.

Swim-In Set

For Cleansed Potomac River

WASHINGTON, Sept. 1 (AP) — The Potomac River, hich former President Lyndon B. Johnson promised would be clean enough for swimming by 1975, is now safe for bathers, an official said.

To dramatize his conclusion the official, Paul Eastman, is helping to organize a Labor Day swim-in in the Potomac at the mouth of Rock Creek.

Mr. Eastman is director of the Interstate Commission on the Potomac River Basin, an ed-ucational planning and research body created by the District of Columbia and states sharing the Potomae watershed — Maryland, Virginia, West Virginia and Pennsylvania.

Mr. Eastman said that upgraded sewage treatment and other cleanup actions have fi-nally made the river safe for swimmers. The Potomac had

been called a running sewer. However, the chief of Washington's water quality of fice. John Brink, disagreed with Mr. Eastman, "I would recommend against the swim-in. I would say that right now, you can't de-pend on the quality of the river," Mr. Brink said.

Crawford to Go on Trial Tuesday in Moscow Court

a political chess game," said today he will go on trial Tuesday for al-

leged currency-law violations.
Mr. Crawford, 38, a Moscow representative of the International Harvester Co., was arrested on a Moscow street in June and held for weeks in Lefortovo Prisoo here. After being conditionally released, he was summoned back to the prison repeatedly for interroga-

Speaking to reporters at Interna-tional Harvester's office here today, Mr. Crawford again insisted that he is innocent

"The charges against me are false," he said. "I have broken oo law in the Soviet Union." Mr. Crawford said that he was served with a summons this morning ordering him to appear for trial at 9 a.m., Sept. 5, at Moscow City

Viewed as Retaliation Many Westerners here view Mr.

Crawford's arrest as Kremlin retaliation for the arrest of two alleged Soviet spies in the United States. The two, Valdik Enger, 39, and Rudolf Chernyayev, 43, both employees of the Soviet UN mission in New York, are to go on trial Sept. 12 in Newark, N.J., on charges of attempting to huy U.S. anti-submarine warfare secrets.

If convicted on the charge of cur-rency manipulation, Mr. Crawford, of Mobile, Ala., could be sentenced to a maximum of eight years in prison. The law also provides for an additional penalty of five years exile within the Soviet Union, but it is doubtful that the courts would charged with buying 20,000 rubles

court by Soviet lawyer Leonid Popov, with whom Mr. Crawford

has spent several days reviewing ev-

idence in the case. Earlier, Soviet authorities turned lown Mr. Crawford's request that a U.S. lawyer be permitted to defend him. But he told the news con-ference that Soviet officials have agreed to let him have the personal assistance — although not court-room representation — of U.S. law-yer Peter Maggs, a specialist in So-viet law from the University of Illi-

> Mr. Crawford said that the court summons listed three Russians as co-defeodants in the case.

Firefighters End Indiana Strike

ANDERSON, Ind., Sept. 1 (AP)
- Firefighters returned to work today, accepting a new wage offer after a hitter six-day walkout dur-ing which a block of buildings burned while most of the 144 strikers refused to help.

A work slowdown by Anderson's police also ended this morning when bargainers for the officers accepted a salary offer from the city. Details of the agreements were oot

The firemen struck at undnight Saturday. On Sunday, they aided in the rescue of several people injured when the roof of a movie theater collapsed during heavy rains. But on Wednesday, all but a few of the impose this penalty on a foreigner.

Mr. Crawford said that he is in the downtown section of the city strikers stood by while six buildings

dian situation on its agenda. It is expected to discuss the subject in a week or two in Geneva.

The U.S. government cannot independently confirm any individual story," said a letter to the world body from the U.S. Ambassador to the UN io Geneva, William vanden Heuvel. "We do helieve, however, that the number and consistency of such accounts on the public record underscore the need for further investigation."

Speaking for the United States, Mr. vanden Heuvel expressed hope that Cambodia would agree to a "neutral, responsible" inquiry on its territory. If not, he suggested, the Human Rights Commission

By High-Level Envoy

U.S. Would Give Moscow Arms-Proposal Preview

By David Binder

WASHINGTON, Sept. 1 (NYT) The Carter administration is seeking to smooth the path toward conclusion of a new strategic arms limitation accord with the Soviet Union by dispatching a high-level figure to Moscow shortly to give a preview of the latest U.S. negotiating proposals, knowledgeable officials said yesterday.

envoys sent to Moscow. The Soviet Union has not yet agreed to this procedure, although it was used with great effect by for-mer Secretary of State Henry Kissinger in negotiating the first strate-gic-arms treaty of 1972. The intent of the mission, officials said, is to provide time for the Soviet leadership to prepare for a fuller airing of the U.S. proposals by Soviet Foreign Minister Andrei Gromyko and Secretary of State Cyrus Vance when they meet at the Uoited Nations sometime after the middle of this month.

Warnke a Possibility

Administration officials declined to reveal who is foreseeo as the U.S. envoy, although Paul Warnke, director of the Arms Control and Disarmament Agency, has been mentioned as a possibility.

In recent weeks, Zbigniew Brzezinski, the president's national se-curity adviser, has indicated to associates that it might help elarify relations between the Soviet Union and the United States if he himself were to calt on the leadership to Moscow, But Mr. Brzezinski is expected to be busy for the next two weeks with the Middle East summit talks that are to begin Tuesday at Camp David to northern Mary-

Nevertheless, officials involved in the nuclear-arms talks acknowl-edge that sending a high-level en-voy to Moscow for "previewing" ourposes represented a reversal of Mr. Brzezinski's approach to the negotiatioos.

The Dutch government said yester-day that it would name a commission of Moluccans to study ways to When the Carter administration presented its first strategic-arms proposals to the Soviet Union in March of last year it did so without integrate that restive minority comany forewarning about the nature of the deep cuts in nuclear forces it ment, Deputy Premier Hans Wiegel said that the Dutch government would have preferred a Dutebhad in mind. The Russians reacted with shock and Mr. Gromyko de-nounced it as a "cheap and shady Moluccan commission, but the Moluccans and a majority in Par-

. The move emphasized the strained relations between the Subsequently, at a press conference, Mr. Brzezinski defended the Dutch and the 40,000 Moluccans technique of delivering the fresh proposals directly to the Soviet living here, many of whom want an leadership by saying that it was an effort to hypass the Soviet military independent homeland on their slands, which are part of Indonesia. Moluccan militants establishment, which he said might have mounted several terrorist op-crations in Holtand in pursuit of have denigrated the U.S. approach before the political leadership had a chance to make up its own mind.

An official familiar with strategic-arms negotiations for a number of years remarked yesterday that the Carter administration later returned to the practice of giving previews of its proposals to the Soviet side just before top-level negotiating sessions. But the previews were given here to Soviet Amhassador Anatoli Dobrynin rather than by

The idea this time, administration officials said, is to give the Soviet leadership, including its mili-tary chiefs, enough time to digest new U.S. proposals before they are tabled formally in sessions be-tween Mr. Gromyko and Mr.

The U.S. officials said that they were confident that remaining is-sues in strategic-arms negotiations could be resolved fairly rapidly One of those issues was whether to treat the Soviet Backfire bomber as an intercontinental nuclear-weapon

The officials said the United States might be willing to accept a Soviet promise not to deploy Back fires as strategie weapons. This somewhat retaxed attitude has been made easier for the United States by the acquisition of new air-de-fense weaponry. Defense Depart-ment officials said.

Eritrea Rebels Claim 7,600 of Foe Killed

ROME, Sept. 1 (UPI) — A spokesman for the Eritrean Popular Liberation Front said today that its troops had killed 7,600 Ethiopian soldiers and wounded another 15,000 in recent fighting in the hreakaway African province.

The spokesman did not specify where the fighting took place, but said that 8 Ethiopian tanks and 36 armored vehicles were destroyed and that "hundreds" of Ethiopian soldiers were captured.

Oslo Finds 7 Bodies In Soviet Spy Plane

OSLO, Sept. 1 (UPI) - Officials said today that seven bodies have been found to the wreckage of a Soviet surveillance plane that crashed Mooday oo the Norwegian arctic island of Hofen.

The plane was thought to be a Tupolev 126 turboprop nicknamed "Moss" by NATO, but officials said that because of the amount of weapons and ammunition found in the wreck the plane might bave been a Tupolev 16 "Badger." The Norwegian news agency, quoting well-informed U.S. sources, said that the United States would be interested in studyiog the surveillance equipment found in the debris, es-

Arab Boycott LONDON, Sept. 1 (UPI) - A House of Lords committee has unanimously rejected a bid to in-troduce legislation outlawing in Britain the Arab trade boycott against Israel similar in the U.S.

Bid to Outlaw

Export Administration Act. In a report, it warned that such legislation would cause potential damage to Arab-British trade. It also said that there is widespread hostility among British business-men against such legislation.

The report on the conversations

hy the embassy officer, Robert McCallum, went to Mr. Mans-field's desk for elearance as a cable

back to Washington. This prompt-

ed an immediate and explosive re-action from Mr. Mansfield.

Mr. Pillsbury, who had traveled on to South Korea for further dis-

cussions, was summarily called home and presented with Mr.

U.K. Panel Bars

Mansfield's protests.

But the committee said that the government should give advice to businessmen enabling them to decide for themselves how to deal with threats to their exports under

the Arab boycott. The committee was named four months ago to study a bill introduced into the House of Lords by Liberal peer Lord Byers. The bill was modeled on the 1977 amend-ment to the U.S. Export Administration Act, which made compli-

equipment found in the debris, especially if the plane was a Tupolev.

The committee's report means that Lord Byers' bill will be 126. dropped in Parliament.

Potato Chip Industry in U.S. Tries to Slice a Better Image

WASHINGTON, Sept. 1 (WP).— The potato chip industry, after selling its product for 125 years to decorate sandwich plates and fill children's stomachs, now feels the potato chip has had a bad press. It plans to spend \$200,000 this year to get those deep-fried, heavily

salted, crisp, thinly sliced pieces of potato, or facsimiles thereof, off the "junk food blacklist" and into more school lunch boxes, governmentfinanced school lunch programs and school vending machines.

If the industry's "hard-sell" campaign accomplishes what it has set

out to do, the potato chip will join "nuts, most fruits and olives" as "auxiliary" foods, says Ron Deutsch, a nutrition adviser to the Potato Chip Information Bureau.

The biggest problem with potato chips, according to nutritionists, is their extremely high fat and salt content. Among the most drastic recommendations in the Senate report "Dietary Goals of the United States," is the need for Americans in substantially reduce consumption of both fat and salt. Mr. Deutsch downgrades the salt and fat questions and contends

that on a per-capita basis, Americans eat only 2 ounces of chips per day and get little salt or fat from them. This figure would be accurate if the entire population, including infants, old people and those on lowsalt diets, are potato chips, but realistically the hulk of potato chips are consumed by children, teen-agers and young adults. Per-capita con-sumption is irrelevant, critics argue. "You cannot compare chips with a nut," said Dr. Walter Mertz, an

Agriculture Department nutrition expert. "And you cannot compare them with fruits, which are lower in calories and have important pectins. Junk foods, fun foods. As long as people eat them just the way you use an olive in a martini, it's OK, but the moment these products take on the image of a real food it becomes risky."

U.S. Quietly Confiscates Imports of Rare Plants

By Richard Lyons

Agriculture Department bas quietly begun to crack down on the importing of plants that are considered endangered species. The pro-gram is a cooperative effort with other countries aimed at preventing the extinction of flora that could be

taling nearly 8,000 plants have been seized at ports of entry, primarily airports at Miami. New York, New plant reserves have quietly Orleans and San Francisco, Those plants seized were listed as being commonly used drugs have been under threat of extinction by the derived from exotic plants and Convention of International Trade more are likely to be because "out in Endangered Species of Wild a small fraction of the Earth's plant Fauna and Flora, which has been species have been screened for ratified by 50 countries since being medically useful ingredients. drafted three years ago.

The exact number of endangered plants is unknown, but the convention lists thousands of types, in-cluding all of the world's 12,000 known orchids, all cactus and many other plants, such as the dwarf palm. If a shipment is seized, the plants can be either returned to the sender or donated to the U.S. government, which may then give them to botanical gardens, or destroy them.

In general, the documentation needed to satisfy U.S. authorities — the Fish and Wildlife Service of the Interior Department certifies the entry of the plants — is a permit from the country of origin stating that it is permissible for the plant to be exported. However, a report titled "Disap-

pearing Species: The Social Challenge" states that the intent of the convention is circumvented because many nations have refused to ratify it. "The delinquent nations include many species importers, such as Italy, Japan, the Netherlands and Spain, and many potentail species exporters, such as Colombia, Kenya, Mexico, the Sudan, Thailand and Uganda," the report said. The report was prepared by Erik Eckholm, a senior researcher with the Worldwatch Institute of Washington, an inde-pendent group that studies global problems

"Although endangered animals receive the greatest public attention, plant extinctions are often more significant ecologically," the report said, noting an estimate that 20,000 to 30,000 of the world's flowering plants are "dangerously rare or under threat."

Air pollution, climatic shifts and changes in the environment by means such as deforestation threaten many species, although "proba-bly far fewer than half of the speseen or catalogued by scientists."

Mr. Eckholm stated that "probably the most immediate threat to

human welfare posed by the loss of biological diversity arises from the shrinkage of the plant genc pools available to agricultural scientists and farmers.

"Future agricultural progress is undermined as the diversity of genes on which plant breeders can draw declines," he wrote, "A local-

Satellite Evidence Backs Theory Pulsars Are Stars

By Thomas O'Toole

WASHINGTON (WP) - The produced by the spinning of the long-held theory that the mysteri-cus pulsars are small, burned-out magnetic field that the electrical stars spinning in the heavens ap- currents producing it would be pears to have been confirmed by a enough to electrocute everybody on satellite pul into Earth orbit almost Earth.

Observatory has measured the have been likened to celestial magnetic field generated by a lighthouses. Theorists bave long nameless pulsar in the constellation Cassiopeia 20,000 light-years away and found it to be 1.5 trillion times stronger than the magnetic field

FDA Chief Says Fast Nitrite Ban Would Be Error

WASHINGTON, Sept. 1 (AP) -A quick ban on nitrites would be foolish, according to the commis-sioner of the Food and Drug Administration, because of benefits they provide, including protection against botulism contamination.

Nitrites, chemical preservatives that have been linked to cancer, are commonly used to belp preserve bot dogs, bacon and other processed meats. Commissioner Donald Kennedy said vesterday that he would not endorse an action "that is going to cause more problems

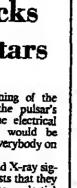

than it is going to cure."
"The botulism risk is nothing to sneeze at," he said, although he added that it will be possible to adopt other means of preventing botulism in processed foods -on a gradual scale. "A risk-free wholesale conversion" cannot be made,

The FDA and the Agriculture Department said Aug. 11 that nitrites apparently can cause cancer in rats and may increase cancer risks for humans.

E. German Hijacker **Used Starter Pistol**

BERLIN, Sept. 1 (AP) - U.S. officials say the weapon carried by the East German who hijacked a Polish jetliner to the U.S. air base in West Berlin Wednesday was a Mondal from starter's pistol, capable of firing only hlanks, and that it was not

The officials said the question of charges and jurisdiction is still under consideration, but extradition to East Germany has been virtually ruled out. They said that if the hijacker, identified as Detlef Alexader Tiede, is tried, it will be by U.S. or West German authorities.

Pulsars emit radio and X-ray sig-The High Energy Astronomical nals in such precise bursts that they lighthouses. Theorists bave long thought that pulsars exhausted their nuclear fuel and then collapsed to spheres no wider than 10 miles across, which spin as rapidly

as 30 times a second. A pulsar is so dense that a spoonful of its material would weigh as much as all the buildings in New York. A star that dense that spins very rapidly should be enough of a dynamo to generate an incredibly large magnetic field. The pulsar in question pulses,

meaning that it sends a stream of X-rays into space by its magnetic field, every 3.6 seconds. The source of the X-rays is the gas that falls from nearby conventional stars onto the pulsar; the gas gets so hot

that it radiates X-rays. The only experimental way of confirming a pulsar's awesome statistics is by indirect measurement of its magnetic field, which is what the satellite has done, under the direction of a team of scientists at the Massachusetts Institute of

Medical Survey Backs Saccharin

WASHINGTON, Sept. 1 (AP) -A survey of health professionals says that more than 70 percent of them oppose a ban on the artificial

sweetener saccharin. The survey, released yesterday, is based on interviews with 517 physicians, dentists and dietitians. It was sponsored by the Calorie Cootrol Council, a group representing low-calorie food manufacturers and the soft drink industry, and was conducted by Market Facts Inc., a Chi-

The Food and Drug Administra-tion, citing studies linking saccha-rin with bladder cancer in rats, has proposed hanning it. The survey indicates that 90 per cent of physicians and 88 percent of dentists believe saccharin is useful to patients trying to restrict caloric or sugar

A Puzzle for Centuries

Exotic Ice May Explain Saturn's Rings

By Malcolm W. Browne

NEW YORK, (NYT) - Ao exot- chowski's theory, which he says ic form of ice discovered several needs to be verified by future obyears ago has turned out to be the servations from spacecraft, radiaprobable key to a mystery that has tion pressure from the sun strikes puzzled astronomers for centuries the outermost A Ring of Saturn, the fact that the famous rings of knocking molecules of water in ionthe planet Saturn vary greatly in ized form off the whirling chanks

In companion papers just published in the journals Science and Nature, astrophysicist Roman Smoluchowski describes his tween the A and B Rings (known as hypothesis, based on recent studies Cassini's Division1 and then conat his laboratory at the Austin campus of the University of Texas, to ice on the particles in the B Ring, account for a number of puzzling characteristics of Saturn's rings.

Dr. Smoluchowski said that he

The ice known to most people. whether in mountain glaciers or refrigerators, is crystalline. Its molecules of water always sort themselves out in an orderly framework that builds into a crystalline

structure.

But the newly discovered amorphous ice, which to a casual observer looks the same as ordinary ice, has no crystalline structure. Its molecules are dumped together

Striking Difference

A striking difference between amorphous and crystalline ice. Dr. Smoluchowski said, is that ordinary ice conducts heat about 100 times more readily than amorphous ice. This fact may have crucial importance in the structure of Saturn's

three visible rings.

Amorphous ice is not commonly known because it can only form at temperatures well below minus 100 degrees Celsius and must be condensed very slowly from single water molecules landing on a condens-ing surface. If conditions are not right, the ice that condenses is the ordinary crystalline form.

Ice has long been known to be the principle visible constituent of Saturn's rings. The rings are thought to be made of myriads of chunks about the size of a fist, made either of solid ice or ice-coated rock, whirling around the planet which is the second largest in the solar system.

The rings extend 86.557 miles from the surface of Saturn, but are thought to be only a mile or so thick. The outer A Ring, which is only moderately hright, is separated by a 3,107-mile gap from the middle B Ring, which is the most brilliant part of the whole system of Saturn, including its rings and 11

The question pondered by scientists has been: If the rings are made, essentially the same material. why should they differ so greatly in

According to Dr. Smoluof matter inward toward the planet.

The ions of hydrogen and oxygen are thus transformed into an invisible wind that crosses the gap be-Cassini's Division1 and then condenses in the form of amorphous All the chunks of matter in the

rings are old, prohably datiog from the time the primordial matter of became aware two years ago of a the solar system condensed to form kind of water ice called amorphous a planetary system. They have thus id time to get very dirty, Dr. Smoluchowski reasons, by sweeping up the clouds of dust that drift

through the solar system. As the outer ring loses water molecules, the dirt and dust mixed with its ice particles continue to dull their luster. But surface ice, probably in amorphous form, is continuously deposited on particles in the B Ring, thus keeping their surfaces hright and reflective, Dr.

Smoluchowski believes. Amorphous ice may explain why the particles in Saturn's rings have not been ground down to microscopic motes of dust over the acons,

he said. Since the particles whirling around Saturn must be in frequent collision with each other, it could be supposed that eventually they would grind each other down like grains of sand. But the particles seem, according to analysis of the light they reflect toward the earth,

to remain relatively large.

This would bappen if, when small particles collide, they could join together.

When two small particles of ordinary ice collide, their energy of motion is converted into heat, but the heat thus produced is rapidly dispersed, because of the high heat conductivity of crystalline ice.

But, in the case of amorphous ice, Dr. Smoluchowski said, the heat would not be conducted away from the point of impact nearly so fast, and ice would melt at the spot, causing the particles to join.

New Look

The role of amorphous ice may force astronomers to take a new look at theories as to how galaxies and stars condensed from the primordial cosmic matter, he said.

For single charged atoms of hydrogen (protons) to combine into molecules of hydrogen - the fundamental building block of the universe — requires the protons to alight simultaneously on the right type of solid surface.

surface would have normally been provided in the early universe by crystals of ice.

But protons will not combine into molecular hydrogen on a surface of amorphous ice, which is the type of ice Dr. Smoluchowski feels probably predominated during the early universe.

The deeper we dig into Saturn the more mysteries we seem to turn up and the more work we make for ourselves," he said.

Light may be shed on some of these puzzles by the two Voyager spacecraft currently on their way to the outer planets. Voyager-1 is scheduled to pass Saturn in November, 1980, and Voyager-2 is expected to come even closer to the planer in August, 1981.

Pioneer-11 Headed for Saturn

MOUNTAIN VIEW, Calif., Sept. 1 (UPI) — The Pioneer-11 spacecraft rechristened Pioneer Saturn, will make man's first close encounter with the Saturn a year from today, the U.S. National Aeronautics and Space Adminstration said yesterday.

The spacecraft, which was launched in April, 1973, has flown a hillion and a half miles since it explored Jupiter in December, 1974, and is now 168 million miles from Saturn. After making readings at Saturn, the spacecraft will go on into space and is expected to continue transmitting signals until its nuclear power supply dies.

Brief Walkout Held At California Airport

LOS ANGELES, Sept. 1 (AP) -Protesting proposed changes in their duties, about 200 American Airlines baggage handlers vester-day walked off their jobs at Los Angeles International Airport, triggering delays of up to 115 hours, an airline spokesman said.

No flights were canceled as a result of the stoppage and negotia-tions were being held to resolve the dispute, the spokesman said.

Brutal Problems in Lebanon

There are, unfortunately, two brutal problems in Lehanon. One is the risk that the struggle there — better, the dozen or two overlapping struggles among different religious communities, classes, ideologies, private armies, individual power seekers and foreign states - will boil over into the Arab-Israeli dispute. Specifically, Syria, which is either trying to hring peace to Lebanon or trying to swallow the place, depending on your point of view, could collide with Israel, which is trying in its rough and confused fashion to keep Lebanon from becoming a Syrian-dominated "confrontation" state.

Precisely this prospect of an Israeli-Syrian confrootatioo. on the eve or in the midst of the Camp David summit, oo less, prompted the surge of diplomacy whose results became at least partly visible this week. The Israelis, who have been sustaining Christian militiamen as a buffer along the Lehanese-Israeli border, finally agreed to admit United Nations peacekeeping forces, though not units of the pitifully small and weak Lebanese

army, into the border zooe.

The importance of this development lies in the fact that the Syrians and Palestinians and the Lebanese government and the United Nations, for their separate reasons, simply could not abide a situation in which an Israeli-sponsored force rejected Lebanese and United Nations authority alike. Every day that those militiamen hung on, the tensioo grew. The new development does not end the danger. But it should quiet down the border as Egypt and Israel and the United States

But the second brutal problem in Lebanoo remains. It is the very real prospect - or so many Christians fear - that the Christian

community, which has flourished in the open and pluralistic Lebanese society for ceoturies, will be institutionally and even physically destroyed by Moslem Arab forces led by Syria. New reports say that Syrian "peacekeeping" forces are currently killing Christian civilians hy the hundreds north of Beirut. That Damascus can claim provocation does not alter the fact that, in upcountry Christian areas, the Syrian army is dominant and its victims are beyond the protection available to Christians near the Israeli fron-

The United States is not insensitive to the peril of the Christians. Certainly to those Christians, however, and to a growing number of people in the United States, the administration appears ready to throw them to the wolves — the Syrians — for the sake of insuring Syria's greater restraint in the Lebanese-Israeli border area and in respect to Mideast diplomacy as a whole. The Christians might be receiving greater international sympathy if they were a rare species in ecological danger, a senior statesman of the community, Charles Malek, observes. The point is that the Christians, for all that they have contributed to their own misfortune, are trapped, desperate and largely alone.

We don't have a foolproof prescription to cure sick Lebanon. But we do not hestiate to say that the United States must use whatever influence it has to press for a cease-fire. which would give the parties in Lebanon the room they oeed to sort out their own affairs free of foreign pressure. A preoccupation with the Arab-Israeli conflict cannot be allowed to distract the administration from a parallel concentration on the bloodletting in

Cambodia

If the war in Vietnam taught us anything, it taught us that military intervention in the affairs of another country can lead to disaster. Sen. George McGovern, who led the fight against the Vietnam war, apparently has forgotten the lessons of that unhappy experi-

Speaking before a Senate Foreign Relations Committee hearing, McGovern called for international military intervention in Cambodia to stop what he calls "a clear case of genocide."

... Even if we were fully cognizant of the enormity of the reported casualties, the decentralization of the [Cambodian] government under the Communist leaders would make military intervention a foolish adven-

"To take over Cambodia, you're going to have to take over the villages - all of them," said Robert Oakley, deputy assistant secretary of state for East Asia affairs. Doesn't that idea have the ring of yesterday? That is what we tried to do in Vietnam.

Where would we get an international force to follow McGovern's suggestions? McGovern certainly must know that Cambodia has become an ideological testing ground for the great Marxist superpowers, China and the Soviet Union.

If we sanctioned military interventioo everywhere genocide is practiced, we would need a full-time standing international army ready and willing to go to China, South Africa, Rhodesia, Uganda, Chile, Ethiopia, Cyprus — the list is long, and fresh accusations are made almost daily.

- From the (Madison, Wis.) Capital Times.

International Opinion

Portugal's Cabinet

Premier Nobre da Costa put together a cabinet that may oot last two weeks. He has tried to avoid this hy picking ministers who would he acceptable to the Socialists and the Communists, to make sure that the two leftwing parties who have the majority in parliament would at least withhold their vote. But it is still not at all certain that the Socialist ex-Premier Mario Soares will oot maintain his tough resistance to the oew government inspired by the president, Geo. Eanes.

Under the Portuguese constitution, the program of the new Cabinet could be passed with the approval of only one faction if the majority withholds its vote and thus the Cabinet could fulfill the most pressing government tasks for a transition period. It will depend on the skill of the technocrats and officers around Nobre da Casta whether the parties give them any latitude for more than half a year. The closer the regular date for elections in 1980 approaches, the less will be the desire of the politicians to let a new parliament be elected for the ioterim. For 1980 is the year in which a parliament can begio to make the first reforms on the present constitution, which was molded by the Socialists.

The new government is also in the path of a conflict between Eanes and Soares. The president is determined, despite Soares' raising the alarm that there is a threat of a rightwing putsch, to exercise his constitutional powers as he understands them. He wants to fill the void that has been created by the inability of the parties to form a coalition.

The U.S. Trade Deficit

Sitting and waiting for the forces of exchange rate changes to turn the current account round will now clearly be a long haul. There are at least three good reasons for

In the International Edition

Seventy-Five Years Ago September 2, 1903

LONDON - The Board of Trade, the British government office responsible for trade and shipping, has just published here the latest statistics on world trade and shipping tonnage, which show the proportionate share Britain has in the world's seaborne tonnage to have significantly diminished during the last 23 years. In 1880 Britain's merchant fleet made up 70 percent of the world's merchant shipping tonnage, whereas it now only represents 65 percent.

this view. First, our own [British] experience with exchange rates has been that they are a slow and uncertain way hack into the black. It takes at least a year . . . for a devaluation to have its peak effect: and the dollar's sharp decline began less than a year ago. Secoodly, a large part of America's deficit is quite clearly a reflection of the faster U.S. growth rate. It will be some time before the measures which Germany took after the Bonn summit and the new measures which Japan is expected to announce . . . have their full impact on U.S. exports. Thirdly, there is some evidence that America's trouble is rather like ours: a reflection of a basic inability to produce the sort of manufactured goods which international markets want. That takes time

The UN and Namibia

— From the Guardian (London).

Plans for Namibia put forward by Dr. Waldheim of the United Nations will come as a shock to those who believed that at last the way has been cleared for a fairly speedy and more or less tolerable settlement. The force of 7,500 soldiers and 1,200 civilians, which he proposes to supervise elections and the transfer of power from South Africa to the new government, would be the biggest that the United Nations has mounted anywhere since the Congo in the 1960s. It would also, at £150 million [oearly \$300 million], be the most expensive . . .

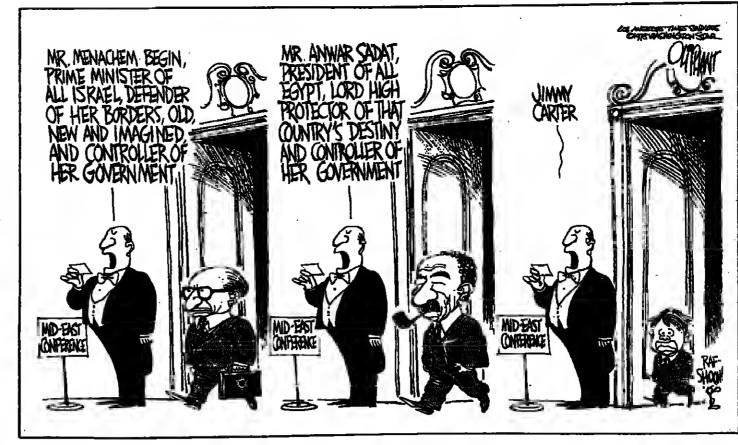

Mr. Botha, the South African foreign minister, has every reason to be flabbergasted at the size of the proposed UN force and indig-

nant at the delay . . . If the UN has the will and the authority to order the terrorists to stop the killing and implement the settlement then a third as

many troops and a third of the time would be ample for the job . . -The Daily Telegraph (London).

Fifty Years Ago September 2, 1928

OSLO - Two seaplane floats picked up from the sea near Tromsoe yesterday were positively identified today as coming from the plane manned by Norwegian explorer Roald Amundsen and the French pilot Lieutenant Guilbaud, which disappeared on June 18 while on a search for the crashed dingible of Gen. Umberto Nobile. The find, made by the Norwegian icebreaker Brodd, would seem to make it certain that the Latham 47 seaplane crahed in the arctic wastes and that the two men are dead.

Camp David: Good Chance, but Not Last

By Joseph J. Sisco

WASHINGTON — The Camp David summit is not apt to be the "final chance" for Mideast peace; there will be more ups and downs to come. But there is reason

to bope the quiet and intensive Camp David exchanges will open new possibilities for progress.

The principal reason is that ocither Egypt's President Anwar Sadat nor Israel's Prime Minister Menachem Begin wants to face the alternatives of the graphic and natives if the summit fails and brings an end to the best opportunity for progress in 30 years. That overriding consideration brought about the quick acceptance of the summit by both men. There is hope that that consideration may influ-ence each to make sufficient coocessions, bringing about a narrowing of differences on substance and ment on cootinuation of the

negotiating process.

In proposing the summit, President Carter had to weigh the risk of undue expectations at a summit against the risk of deepening stale-mate, which might have forced Sa-dat reluctantly to declare a death knell on his initiative of last November, The administration was fully aware of the checkered career of summitry. The successes have

been exceptions, not the rule, More often than not, summits have failed. As the late Secretary of State Dean Acheson once put it: "The result has all too often been a gamble, the experience nerve-racking, and results unsatisfactory. . . When a chief of state makes a fumble, the goal line is open behind

Many questions have arisen regarding the U.S. role at Camp David. How can President Carter be both middleman and full part-ner? Is this not an ill-prepared sum-mit, a device to lift Carter's sagging polls? Is the summit a cover for putting forward a full-blown U.S. peace plan?

Well Prepared

If one means by ill-prepared that the Carter administration does not have prior commitments from the parties that ensure a successful outcome, then such an argument can be made. But the Camp David meeting cannot by any fair, objective standard be considered ill-prepared. The fact is that direct negotiations between the parties will be resuming where none were taking place; that for nine months talks at various levels and places have defined both common elements and differences between the parties. A substantial basis has been laid for the meeting. The president's diffi-cult task will be to talk the parties through their problems and lead them to a further evolution in their positions. The reality is that agreement, if it is to come at all, must come at the top How will Carter reconcile the

"honest broker" role covisioned by Begin and the "full partnership" proposed by Sadai? He cannot do so entirely, anymore than he can entirely avoid leaning on one side or the other at different times. He will bave 10 insist on coocessions from both sides and allay fears oo both sides. Israel fears that Carter will press it to accept withdrawal from the West Bank and Gaza without adequate assurances against establishmeot of a hostile Palestinian state. Egypt fears that Carter will press territorial compromise oo the West Bank without ad-equate assurance oo withdrawal of

Use of U.S. Troops Called A Hindrance in Mideast

By Tom Wicker

NEW YORK — The Carter administration, in its preparations for the Camp David summit, has been toying with the explosive idea of using U.S. troops as a sort of last-ditch means of resolving the Middle East impasse. That's a ditch that President Carter, an expert at getting himself into holes, might better avoid disease

The Washington Post, quoting "sources," reported this week that Mr. Carter would "carry proposals" to Camp David for a U.S. air base in the Sinai desert and for posting U.S. troops on the West Bank, if these steps would break a deadlock. That may have overstated the case somewhat, because when Mr. Carter was questioned about it he said he'd be "reluctant" to take such steps. But he added: "I'll bave to wait and see."

The State Department immediately labelled the report "speculative and premature." although a spokesman conceded that "supplementary guarantees" might at some point be useful to "supplement and underwrite any agreement" between the parties to Middle East negotiations. Press Secretary Jody Powell further roiled the waters by remarking that "the question of a generalized American presence has always been there." He clined to explain what he meant by a "generalized American presence."

All this suggests that the president's national security adviser, Zbigniew Brzezinski, who has been reported to favor an expanded U.S. military role in the Middle East, may be pushing the notion further than the State Department likes - even to floating a trial balloon. However that may be, the Israeli government immediately took its usual cool position on the idea of U.S. troop assistance, saying that Israeli personnel must be "the main center pillar" of security arrangements on the West Bank.

Sinai Base

The Israelis were somewhat warmer to the suggestion that U.S. troops might take over an Israeli air base in the Sinai, after the return of that area to Egypt. Even so, the idea of U.S. military forces in the Middle East seems to go far beyond anything that could be described as "a generalized

American presence" or "supplementary guarantees."

What, for example, might happen if U.S. troops, attempting to maintain order and security in the volatile West Bank, were to suffer costly terrorist attacks? Under the pressure of public opinion both in this country and in Israel, they could easily be drawn into conflict with Palestinians, eveo with other Middle East nations.

At the least, such conflict would tend to make the United States look like Israel's protector, even more than the presence of U.S. troops would in any case. While Palestinians oow living in the West Bank might rather have U.S. than Israeli security forces, militant and terrorist organizations would not occessarily share that view and might even see U.S. troops as a greater threat to their own plans.

Introducing U.S. troops ioto the Middle East, moreover, seems bound to increase the risk that any local conflict would quickly involve the major powers. On the face of it, the idea seems provocative to the Soviet Union, one that might lead Moscow to seek some conotering "presence" of its

Underlying Issues

Those might be risks worth taking if it were not for the fact that putting in U.S. troops would be unlikely to solve any of the underlying issues; if, for example. Prime Minister Begin and President Sadai cannot agree between themselves on terms for the return of the Sinai, a U.S. takeover of the Israeli air base there would only delay resolution of the issues.

Once U.S. troops were in place, moreover, the parties might find it more convenient to let them stay there than to work out the basic unresolved issues that would be responsible for their presence.

Finally, since the Middle East does not exist in a vacuum, deployment

of U.S. troops there would surely increase pressures for a U.S. "presence" elsewhere. Saudi Arabia, for example, with its fears of Communist penetratioo of Africa, might well intensify its efforts for U.S. countering action; and once U.S. forces planted themselves anywhere in the area, the Saudis probably would be reluctant ever to let them leave.

Undoubtedly, the administration, fearing an end to the so-called Sadat initiative and a total breakdown of Middle East negotiations, has m mind nothing more than deadlock-breaking proposals. But last resorts can sometimes be worse than what they are intended to prevent. And Mr. Carter's primary job at the summit for which be is so greatly responsible is to encourage Mr. Begin and Mr. Sadat to compromise, sacrifice and agree on basic issues, such as Israeli security and ultimate sovereignty on the

Offering U.S. troops, however well-intended, seems more likely to provide an excuse for not taking the difficult steps that a real agreement must

cerns can be met without substan- mooths. While Sadat cootinues to adhere publicly to Israeli withdrawal from occupied territories, he has recognized the need for security arrangments in the West Bank and Gaza and is prepared to negotiate an Israeli military presence there for an interim period provided Israel accepts the principle of with-drawal in accordance with Resolu-tion 242. Therefore, total withdrawal of Israeli forces in the strictly military sense as it applies to the West Bank and Gaza during a fiveyear interim, transitional period is no longer a ceotral issue. This offers some room for maneuver at the summit. Carter's frequently stated reaffirmation of the U.S' support for Israel's security, and his insistance be will not cut off military or economic aid as a means of pressure have been made in the knowl-edge that the distinction between security and sovereignty is fundamental to any U.S. suggestion at the summit to break the present deadlock over the West Bank and

Palestinian Issue

At least as difficult is the Pales-

tinian self-determination issue, which cannot be divorced from "peace-withdrawal-security." It is less clear bow progress can be made on this issue. The president will inevitably have to focus on how the five-year interim period for the West Bank and Gaza cannot only provide for necessary security arrangements, but offer the opportunity for evolution in self government, which could bring forward moderate Palestinian leadership there. Discussions at Camp David are apt to center on the so-called Aswan formula, or some variant, which calls for Palestinian Arabs being give the opportunity ulti-mately to participate in the process determining their future. Presumably, this would happen at the end of the five-year period during which an on-the-ground practical test of self government would have been experienced. But the results at Camp David on this point remain very problematical.

There will be no pre-cooked overall Carter peace plan at the summit. There is no reason to doubt the president's categoric assurances on this point. But there will be — there must be — U.S. ideas and suggestions injected into the breach. Each side has historically found it less difficult on occasions to camouflage their concessions as U.S. ideas or as concessions to the United States. Any U.S. ideas are apt to draw in part on Egyptian proposals on security and with-drawal of Israeli forces, and Israeli ideas for an interim solution of self government in the West Bank. The hope is that Carter's personal intervention will bring forth compro-mise from both sides: a commitment to the principle of Israeli withdrawal from the West Bank and Gaza, and a commitment by Sadat to security arrangements for Israel that leave room for some border modifications and some provision for ultimate Palestinian Arab participatioo in determining their future. An overall settlement is not achievable at the summit: a partial settlement between Egypt and Israel is unlikely. But there is hope that progress on a framework for future negotiations, broadened eyond Egypt and Israel, can be found to carry the peace process The summit is worth the gamble.

Cancer: The Enemy Is Us By Elizabeth Whelan

Los ANGELES — Americans are in the grip of a new and serious disease. The symptoms include anxiety, distrust, fear, resentment, panic and sometimes rage. I have found that susceptibility is nearly universal — old, young male, female, highly educated or

The disease I'm referring to is generally transmitted by the mis-directed efforts of so-called consumer advocates, unsettling books, magazine articles and newspaper headlines and, most recently, a se-ries of television specials about ill health in the United States

The disease is cancerphobia.

Many people in the United States have come to accept the prevailing view that we are in the midst of a cancer epidemic, surrounded by a sea of carcinogens, at the mercy of an array of noxious chemicals. This is no surprise, given that media reports frequently refer to our "cancer epidemic," indicating that mortality rates are soaring strongly implying that this trend is a frightening manifestation of the effects of advancing industrialization that leaves us victims of adulterated and overprocessed food, dangerous drugs, polluted air and water, and hazardous workplaces.

This rampant cancerpbobia has The disease is cancerphobia

This rampant cancerphobia has stimulated urgent cries from many sectors for the government to "do something" to stop the industrially induced cancer carnage. A number of federal agencies — including the Food and Drug Administration, the Environmental Protection Agency and the Occupational Safe-ty and Health Administration are responding to this public con-

are responding to this public con-cern by setting guidelines for the identification and regulation of car-cinogens in our environment.

This should be good news. Mea-sures to prevent the cancers that claim the lives of more than 385,000 persons in the United States each year are far more effec-tive and less occupy than the existing tive and less costly than the existing means of treating them. But, unfortunately, the news is not really that good. In their eagerness to fight cancer, our regulatory agencies have misidentified the enemy.

Analyses of disease patterns made by researchers from the Na-tional Cancer Institute and else-where indicate that 30 percent to 35 percent of all cancer deaths in the United States are the direct result of cigarette smoking. While acknowledging that other causes of cancer are not as well established and noting that nonenvironmental factors such as genetic propensity play a role, many cancer epidemiologists now believe that another large portion of cancer mortality, perhaps 20 percent to 40 percent, is related to overnutrition (specifically, the typically high levels of fat and cholesterol in the Western

Additives

In contrast, the escalating gov-ernment war on cancer is based on the assumption that the many forms of this disease result from involuntary exposure to a variety of treacherous chemicals. The Food And Drug Administration purports to protect us from cancer by prohibiting the use of any additives that induce cancer in even one type of laboratory animal indeed, federal law mandates it to do so under the Delaney amendment — even though epidemiological studies have never implicated food additives in even one case of buman carcinoma. Actually, the death rate for stomach cancer has declined significantly since use of food addi-

15.71

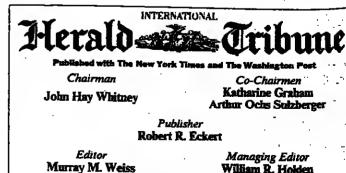

2521

tives became widespread. As prevention policies continue to evolve in Washington, we are witnessing the reflection of a sincere desire to reduce cancer's toll, yet also a stubborn unwillingness to accept the reality that cancer is largely rooted in imprudent life-styles and thus its major risk factors are within our own control.

Asking our representatives to ban saccharin, put warning labels on hair dyes and generally get rid of "cancer-causing chemicals" may make us feel that we are "doing something," bot in the long run it will prevent few, if any, cancer deaths. Indeed, there appears to be a legitimate question as to whether, after all the expenditure and sacrifice, our government will succeed in preventing even one case of buman cancer. Our war on cancer needs to be refocused, the enemy redefined. As the cartoon character Pogo once said, "We have met the enemy, and he is us."

Elizabeth Whelan, D.Sc., is executive director of the American Council on Science and Health in New York and a research associate at the Harvard School of Public Health. This is adapted for the Los Angleles Times from her article in the Cancer Junnal for Clinicians, published by the American Cancer Society.

Urban Violence as Metaphor

By John Walker

ONDON, Sept. 1 (IHT) — Thomas Babe, whose "A Prayer for My Daughter" has opened at the Royal Court's Theatre Upstairs, is another American writer who seeks a metaphor for society in the casual violence of a big city. Just as David Mamet in "Ameri-

can Buffaio" wrote of three smalltime crooks and expected his audience to make connections with big business morality and the sort of ethical attitudes that informed Watergate, so Babe, whose play was first produced in New York earlier this year, makes his point hu a play in which police and criminals are indistinguishable from each other.

His larger intentions are signaled by the date of the play's happen-ings: July 4. And while the Inde-pendence Day celebrations spill into the city streets, two detective sergeants bring back to their squalid squad room two strung-out junkies who are suspected of murdering an old lady for a few dollars.

The cops' interrogation is per-functory and consists of taking the two into a room, one at a time, and beaung them up. For all agree, at an early stage, that the blame for the crime will be pinned on the younger of the two junkies, a born vicum and, though the word has not much meaning in this context.

Symmetry Stressed

Babe's play, with its grimly de-tailed setting, appears naturalistic, but his intentions are concerned with inner realities. The dialogue moves away from the sardonic -'I never hit faces. I ain't sadistic." says one cop as he prepares to beat up a suspect — into a self-drama-tizing rhetoric that is close to the attitudes expressed by so many of Teanessee Williams' characters self-pity mixed with a desire to act out the roles society expects them

By David Stevens

The difference between the criminals and the cops is minimal. Indeed, Babe stresses the symmetry

of the situation. Sean, the oldest of the suspects, is a professional criminal who first expresses a sentimental relationship with the young junkie Jimmy, regarding him as his child, but neverthless betrays Jim-

my without a qualm.

Kelly, the oldest of the cops, has a daughter threatening suicide at the other end of the phone during his interrogation, but does nothing to save her and, when she finally blows off her head, is grateful because his future relationship with her will be a simple one, uncomplicated he reality. At the climax of the play, he cradles the naked Jimmy in his arms with a tenderness he denies his own children.
In the same way, when Jimmy

asks the other cop, Jack, for a fix, Jack reveals that he, too, is a drug addiet and has a fix first, before offering Jimmy one. The violence of Babe's language

and action seems actuated by despair. And this desperation is centered in his characters' solipsism. Each is in the solitary confinement of his own messed-up life, Although their lives overlap others, they do not touch them at any

But it is precisely this immersion in the self, and the characters' refusal to take responsibility for their own actions, which makes the play seem posturing, an exercise in the rhetoric of self-disgust. On this side of the Atlantic, at least, its resonance is a little hollow.

Max Stafford-Clark's direction is masterly, though, and there are four fice, intense performances from Donal McCann. Anthony Sher, Kevin McNally and John Dicks which move from the natural to the artificial without strain.

In an essay included in the program, the American critic John Lahr suggests that America treats its playwrights badly, always seek-ing new talents but doing nothing to nurture writers after the first excitement of their work, "Most play-wrights of promise rarely have the opportunity to fulfill their gift," he writes, "If the crives don't demoralize them, the terrifying econom-

He contrasts the situation with the British one, where subsidies are available for theater and where the television companies not only discover new talent but sustain writers and commission plays which are sometimes better written and directed than their stage work.

If Lahr's analysis is accurate, it may explain that particular note of desperation found in the work of some young American writers, which seems less the result of horror at the working of a corrupt society than an expression of personal frustration.

At the Queen's Theatre, Boh Hall and David Richmond's "The Passion of Dracula" is prepos-terous nonsense, acted and directed with a great deal more style than it

It is the first of two plays about the Transylvanian vampire to reach London from New York and it is difficult to understand its apparent appeal. The authors have written a parody of an English drawing-nom play, in which the intrusion of the supernatural makes for some usement, although this palls

long before the end.
The actors, notably Richard Vernon and James Villiers, intone the dialogue through stiff upper lips as if they believed in it. Beth Morris shudders orgasmically as Dracula's intended hilde. As the Count. George Chakiris has the right romantic appearance, although he has little else to do but act as a sort of saturnine fashion model, show-ing off a different costume for each

Clifford Williams has given the production much polish as well as claps of thunder, howls of dogs, and a great deal of dry ice. But the special effects are wretchedly unimaginative and Dracula's final disappearance was somewhat spoiled by the sight of his arm sticking out from beside a sofa. As melodrania,

The Art Market-French Need to Reform System to Face Competition

By Souren Melikian

PARIS. Sept. I (IHT) — End of season results make it clear that drastie changes must take place in the French auction system if professionals want to attract foreign sellers or even keep up their

Most urgently needed is the re-form that will induce auctioneers to pool resources. That means first of all concentrating and sorting out hy category the goods entrusted to them for sale. As long as all available leading impressionists are spread out thinly in a sprinkling of otherwise minor auctions instead of being lumped together in two or three yearly sales as is the case in London, the French market will not be able to hold specialized sales. That is the No. 1 problem.

Under present circumstances, it is clear that this pooling of national resources is not possible. Personal rivalries and petty jealousies are such that auctioneers with small tenures are not willing to part with the one or two important works they may have chanced to come across and have them included in their colleagues' more important sales. It happens occasionally which is not enough — and affects a handful of works, while it should be systematic. The Paris market could stage wonderful French and European silver sales, and porcelain aucitons every bit as glamo-rous as the remarkable sales organized by Christies's - and it does

Clearly, concentration is needed. But the "privilege du commissaire priseur." as it is understood today, is thought by some to stand in the way. Once an auctioneer holds a tenure for which he has had to pay a large sum, the rationale is that he will not take steps that might seem to jeopardize his investment. He will not divest himself of those goods he can sell in person since he hopes to enhance his prestige and. thereby, the monetary value of his tenure. If there were no such "privilege" and if the rules applying to auctions were those of normal husiness, competition would soon change the situation. The less active members of the profession would

Advertising

The right to horrow from banks. which French auctioneers do not have, to advertise and publicize without restriction — an absolute must in the auctioneering husiness the right to negotiate the exact fee requested from the seller — again, a must in major sales — all these rules of ordinary husiness would allow French auctioneers to compete with their foreign colleagues on an equal footing, and, no less important, would force out of the profession those who have

not the ability and scope.
If anybody still believes that the old system making auctioneers officers of justice is really necessary to protect the rights of the creditors when judiciary sales are ordered by a court, then it could be preserved for those judiciary sales. However, even there it seems obvious to many professionals that the right of creditors would be hetter safeguarded if they got more money

considerable expertise - a practical kind of expertise hardly ever

tioneering profession, experts have no legal standing. Anybody is enti-tled to call himself an expert. What differentiates self-styled experts from auction-room experts is the fact that the latter have two profes-sional associations which they join by being co-opted by the members. metimes they are appointed to courts of law or to customs authorides. Auctioneers recruit the experts whose advice they seek from these two professional associations although they have no obligation whatsoever to do so. These experts are called in for advice on such specialized categories as old masters, impressionists, silver, porcelain, etc. The majority are dealers, which is how they acquire their sometimes

pertising system. Unlike the auc- and hardly spend any time doing cataloging is often vague. Countless the required research work over pieces that can raise difficulties. Because they receive a percentage on the knockdown price, varying from 3 to 5 percent according to categories, they have a vested inter-est in "expertising" the largest pos-sible number of items. But one result is that some of these experts have a universal competence that is truly impressive. **Enormous Range**

Two of them catalog the whole range of primitive arts from British Columbia to New Zealand, ancient Egyptian art, Roman and Greek antiquines, medieval art, Byzantine works, Islamic art from Morocco to Islamic India, Renaissance bronzes carvings, enamels, Louis XIII and Louis XIV objets d'art and even backed by an academic back-ground. In fact, they vary from the Renaissance and early 17th-century

out of their debtors' possessions through better salesmanship; from the seller's viewpoint, judiciary sales are generally counterproductions are generally counterproductions.

Their merits aside, the frametious because they are financially work within which they operate is unsatisfactory. Experts are often be different to substance, period or provenance from the description and their debtors' possessions through better salesmanship; from the seller's viewpoint, judiciary work within which they operate is unsatisfactory. Experts are often be different to substance, period or provenance from the description paintings go down as "attributed to" or "school of" and innumerable objects are dated in the vaguest terms or even given no date. That does not prevent the expert from getting his percentage.

This system damages the reputation of experts as a whole and does nothing to enhance the image of French sales outside of France,

The English system, where the heads of the departments con-cerned and their assistants, with their own specializations, give an opinion without being legally responsible for it, is on the whole more convincing and less costly.

If larger auctioneering groups ex-isted in France, they could afford to have their own full-time department heads as in England.

Compared with the two hasic reforms that will revise the expert

by legally recognizing what the auc-tion husiness has gradually developed into in the last 20 years, that is, a key sector of the art market, all the other measures seem minor and easy to implement. Auctions are overtaxed, the

French state / percent of the proceeds. The law that imposes payment of a 3 percent royalty, taken from the seller, to living artists or the heirs of deceased artists for a period of 50 years fullowing their death is a penalty. Artists get little out of it — poor unrecognized artists virtually nothing. The only practical effect is to deter foreign sellers who own impressionist or modern paintings from selling in France and induce French sellers to send their property to England.
Steps to correct these deficien-

cies in the French market can only he done with the acceptance of the profession itself, and therefore after a good deal of explaining. In the meantime, an economic hattle is being lost hy the nation: As a source of revenue and prestige, the auction market has become a major

Cannon Player Is Always Loaded for Tchaikovsky

By Tom Gorman

SAN DIEGO — Charlie "Boom Boom" Marsh's musical reper-toire consists of just one note. It is a basic cannon hlast. Most musicians carry their in-struments in cases. Marsh hauls his

in a trailer. Before a performance, most musicians will play a few measures on their instruments. Marsh loads his. Not too many compositions, of course, call for someone to play

cannon. But, then, there are not too many cannon players, either. And that is why Marsh is in demand throughout the United States when an orchestra is to perform Beethoven's "Wellington's Victory" or Tchaikovsky's "1812 Overture."

That was the case recently when the San Diego Symphony per-formed Tchaikovsky's composition, under the haton of guest conductor Andre Kostelanetz. It was easy to spot Marsh. He was the man fiddling with four cannons and 13 mortars. "The 1812 Overture" is scored for 16 cannon blasts. Kostelanetz likes to add a 17th at the end of the piece to serve as a sort of exclamation point.

Marsh, who lives near Escondi-

do, Calif., is not a musician by profession and admits he is a selftaught canoon player since no schools offer formal musical tostruction in cannon.

Collects Cannons

Marsh, 62, a retired marketing executive for several electronics firms, has a background in electrical engineering. His hobby is reconditioning antique pistols (he has more than 100) and collecting Civil War cannons (he has three).

He got into the cannon-firing business during Fourth of July celehrations years ago, he said, and performed in his first concert in 1968 in Philadelphia. Since then, he

Charlie (Boom Boom) Marsh leans on a musical instrument he lugs around U.S. concert halls.

has performed throughout the United States.

Today, he said, "there are two or three other owners of Civil War cannon or - as io the case of conductor Arthur Fiedler to Boston modern National Guard equipment to provide the cannon blasts."

Since during the performance of "The 1812 Overture" a cannon can be fired only once ("There's no time to reload"), Marsh uses his three Civil War cannon, a three-

quarter-size replica and 13 mortars.

"The first 13 blasts are from the mortars, with simply a flame-andsmoke charge to the cannon being set off to provide the visual effect." Marsh said. The last four blasts are exclusively from the cannon.

Because a fuse would not offer the precise timing needed for the charges to be set off, Marsh has built two control boxes which can set off the cannon electronically for instantaneous results.

A remote control box was open ated by a percussionist in the orchestra, who simply pressed a "Fire" button at the appropriate

Marsh was offstage, holding the second control box to case, for some reason, the remote control box did not operate properly. Was that to suggest that something

might have gone wrong? Well, I remember in 1969 I was asked to perform with the Los Angeles Philharmonic for 'Welling-ton's Victory.' it calls for 108 "We had just built a new control

box and we only had time to practice firing 10 blasts. It worked fice. And when we began the actual performance, the first 10 shots again went off fine. But starting with the 11th, every time we wanted to set off a single charge, 10 went off by mistake.

"Yon just wouldn't believe it Windows broke, micrors broke, we even broke plumbing fixtures and the stage started flooding." It was the year Boom Boom Marsh almost sank the Los Angeles Philharmon-

the mainstream of the 1920s avant-

Music in Lucerne

UCERNE, Switzerland, Sept. 1 (IHT) — Most commemorative concerts are necessarily retrospective, but the Lucerne Festival concert devoted to the music of three generations of the Teherepnin family not only paid tribute to the past but gave it new meaning by linking it to the future.

The festival's original idea was to have Alexander Teherepnin (bornland)

1899) conduct music by himself and his father, Nikolai (1873-1945), works by his two composer sons. Serge (born 1941) and Ivan (born 1943). The death of Alexander last Sept. 29 gave this concert its "in memoriam" aspect and led to some program changes, but the hasic idea remained — a musical portrait of a remarkable family of composers, and a firm still very much in

Each composer in the program was, and is, decidedly an artist of his own time. Nikolai, a pupil of Rimsky-Korsakov, was a conductor of the Imperial Opera to St. Peters-burg and for Diaghilev in Paris, and a teacher of conducting (Prokofiev was among his pupils). Alex-ander emigrated with his parents and matured as a composer in hetween-the-wars Paris, taught in the United States after the war (and became an American citizen) - a busy conductor and pianist and a prolific and cosmopolitan composer who never lost touch with his Russian bentage Serge and Ivan both studied at

Harvard and with Stockhausen and Boulez, among others, and both are deeply, hut not exclusively, involved in electronic music Serge's principal activity now is designing and building musical synthesizers, while Ivan teaches at Harvard, where he heads the elec-

Yet, in a family portrait, one looks for resemblances as much as for differences, and in this program of works ranging in time from 1899 to 1978 the family resemblance came most clearly in the rich, al-most exotically colored use of the

symphony orchestra.
"We grew up in an ambiance of certain types of melodies, of certain musical curves," Ivan remarked af-ter the concert. "When I hear those things. I know immediately that it is the music of my father or one of his friends, like Prokofiev or Martinu."

The program opened with Niko-lai Tcherepnin's Prelude to "La Princesse Lointaine," an eight-min-ute tone-poem-like piece that both underlined the direct link to Rimsky and suggested a predisposition to the influence of the French "impressionists" that was later to earn him the jocular nickname of Debussy Ravelovich Tcherepain.

Alexander was represented here by three works. "Mystere" for cello and chamber orchestra (1925) and the Triple Concertino for piano, cello, violin and string orchestra (1931) display rhythmic and tonal complexities and unsentimental

AUTHORS WANTED

The Symphony No. 4 (1957), perhaps his best-known orchestral work, written at a time of personal difficulty, is a far more personal statement and a more Russian one than the earlier works, with its iron-ic waltz of the second movement and the explicit citation of medieval Russian liturgical themes in the pianissimo finale.

Gennady Rozhdestvensky conducted the music of the two earlier Teherepnins with alert sympathy and an intuitive sense of style, and drew excellent performances from the Basel Radio Orchestro.

The third generation was repre-sented only hy lvan's "Le Va et le Vient," a 17-minute orchestral piece based on a much longer electronic work for oboe and synthesizer (huilt hy Serge, whose own or-chestral contribution to this concert was not completed in time).

N.Y. Philharmonic to Argentina BUENOS AIRES, Sept. 1 (NYT)

— The New York Philharmonic is traveling 10,000 miles for two concerts at the Colon Theater here Sunday and Monday thanks to the determined efforts of a woman, Jeannette Arata de Erize, to bring the best in music to Argentina's knowledgeable public.

The concerts, which are a high point of the musical season, are sold out for the Colon's 3,000 seats. and boxes have been taken at \$1,000 each by private companies But Mrs. Erize, who is president of the Mozarteum Argentino, a private nonprofit association that contracted the visit of the Philharmonic, said that half the audience

would be "young people paying less than a cinema ticket."

This is in line with the Mozarteum's policy of cultivating an appre-ciation of formal music among youth and providing fellowships and study grants for talented young

The prestige of the Mozarteum both here and abroad under the di-rection of Mrs. Erize made possible the contracting of the New York Philharmonic in an unusually late scheduling. Mrs. Erize said that she learned

last December that the Philiar-monic had free dates over the Labor Day weekend because of a can-

The two-concert visit is going to cost the Mozarteum \$220,000, underwritten mainly by a group of Argentine and U.S. corporations with affilintes here. Argentine Airlines is helping in the cost of tran-sporting 125 musicians and other members of the orchestra.

The German Democratic Republic offers considerable potential on plant exports

The GDR foreign trade enterprise Technocommerz GmbH handles the exports of important factories and combined works of the GDR metolworking industry.

Its range includes complete dieseldriven generating sets, diesel engines, plant and equipment for air canditioning, ventilation and refrigeration, complete irrigation ond drainage pumping stations, pumps and campressors.

Also in demand an the world market are units and standard camponents made by ORSTA Hydraulik, power station plant and equipment, fittings for all industries, gears and clutches, plant and equipment for electroplating, as well as castings and forgings. Technocommerz represents the interests of such renowned plant and equipment producers as:

VEB Lufttechnische Anlagen

VEB Kombinat Pumpen und Verdichter Halle, and

VEB Schwermaschinenbaukombinat Korl Liebknecht Magdeburg.

Top Class Air Conditioning and Refrigeration Plant

An important position in the Technacommerz delivery program is accupied by the GDR oir conditioning and refrigeration engineering industries. Ventilation, air conditioning, refrigeration and de-dusting installations and plant, which are planned, designed and produced by the enterprises represented, are exported by

Technocommerz to as many as 25 have developed specialized know-how, technalagies and methods. The enterprise meets countries. Testifying to the topquality work done in this field are the needs of many users and af-

15 Gold Medals awarded at Leipzig Fairs since 1968, as well as numeraus diplamas and medals won at foirs and special graup displays obroad.

The comprehensive Technocommerz range in the field of ventilation and refrigeration includes:

Electrostatic de-dusting plant (for de-dusting smoke gas at large-scale and industrial thermal power stations, for the chemical and iron and steel industries),

Cooling units for refrigeration installations in the food and toble luxuries industries, e.g. dairies and breweries, and for the chemical industry.

Air conditioning installations for computers and public and industrial buildings.

Cooling tower fons (for cooling waste water at thermal power stations and large chemical factories).

Cold-starage installations (for meat, poultry, fish, fruit, vegetables and dairy products).

Technocommerz offers both coldstorage equipment and complete cold-storage depots produced by VEB IMEX. The program also indudes machines and cooling units ortificially frozen skating

Because of the great voriety af demonds made on ventilation engineering, experts of the VEB Lufttechnische Anlagen Dresden

fers specially designed units and machine systems for public, industrial and power station buildings, for agriculture and the public health service.

Berlin Palace of the Republic Demonstrates Industry's Efficiency

The Dresden factory has provided a fine example of its capability by autfitting the Palace of the Republic with latest installations, making stays at its fully air-conditianed rooms and holls very pleasant.

Dresden experts took over primary responsibility for this complicoted assignment. Same 650,000 cubic meters of enclosed area had to be equipped with oir conditioning facilities. That colled for some 2 million cubic meters of oir to be maved hourly and a cooling copacity of some 8 millions kcal per hour.

Ta abtain these parameters, some 150 plants were assembled at six central stations in cooperation with GDR and foreign firms.

Marine Diesel Engines Prove Their Value VEB Schwermaschinenbaukombi-

nat Magdeburg (SKL) is a wellknown producer of mediumspeed diesel engines. At modern production deportments, campany-mode engines are finished into iesel-driven generating sets. Diesel engines and generating aggregates from the GDR have proved their ments on multiple occasions in generating electrical energy both as stationary plant have been delivered for power and aboard ships.

From Complete Cold-storage Depots to Marine Diesel Engines

with the young independent states, SKL has made a major contribution to the creation of their own fishing fleets. Among other things, complete power generating plants were delivered to Iraq and Syria, while marine diesel engines and stationary diesel-driven generating sets went

Export of Plant — A Promising Field of GDR Foreign Trade

The export of complete machine of them are presented in the ortisystems, production lines and equipment---ás well as complete plant and factories—is growing on a worldwide scale. This trend is evident both in trade between 'industrialized' countries and in commercial relations with the developing nations.

And there is growing interest in purchasing both software and hardware far camplex technologicol processes from a single firm. A look at the structure of the GDR's foreign trade thus reflects on increase in the export of plant bath in obsolute figures and per-

The GDR has considerable scientific, technological and production resources, o prerequisite for meeting the high demands placed on plant export. Growing specialization and cooperation omong the socialist countries united in the CMEA facilitates concentration an fields with particularly favorable prerequisites. The most important

MAPLE IN

cles below.

The GDR's leading plant exporters include the WMW Export-Import, Elektratechnik Export-Impart, Transportmaschinen Export-Import, Maschinen-Export, TechnoCommerz GmbH, Unitechno and Invest-Export foreign trade enterprises. They represent commercially important and structural industries which are characterized by especially rapid development of research and produc-

For foreign buyers, these enterprises are the sole commercial partner. This has proved to be o major advantage considering the large number of sub-contractors normally involved in designing, assembling and handing-over of a plant.

Naturally the largest plant export transactions are with the socialist countries, especially the CMEA states, which are the GDR's main trade portners. At present, entire industrial complexes are being set up in the sociolist economic region by firms from two or mare CMEA countries. Acceptance of orders for such projects is in the hands of the most important sup-

Of course, plant deals with the CMEA countries da not accupy the entire production copacity. Conditions are also favorable for export to developing and industrialized copitalist countries which, already today, are major buyers af plant from the GDR. Export to the West is transacted

in many ways. At the mament, the "classical" method of concluding contracts with general ond exclusive suppliers is still the most important one. Diverse cooperation relations, however, have also been increasingly develaping with copitalist countries. The GDR is on equal portner in setting up majar investment prajects of Western firms and proves with its products that it is able to fully meet their high demands. In its commercial relations with industriolized capitalist countries. the GDR increasingly pursues another even closer form of cooperation-joint realization of thirdcountry deals.

In addition to plant exports to Third World countries already being implemented jointly by GDR foreign trode enterprises and Western firms, a series of concrete negotiations is being held on this subject. Partners to these tolks are the major plant exporters of the GDR and trusts from highly industrialized countries of Western Europe and Jopon, It can be expected that these contracts will result in further cooperative projects.

The fact that such elements as market familiarity; market position and existing contacts may be used to mutual benefit must not be underestimated when discussing such projects.

Cooperation ogreements are important nat only fram the purely commercial standpoint, but also with regard to commercial policy. The GDR's active commitment to this form of cooperation is in keeping with the Final Act of the Helsinki Conference an Security and Cooperation in Eurape, which ottaches great importance to claser economic cooperation between states of different social systems for the further stabilization of inter-governmental rela-

It should be borne in mind that the GDR always proceeds from the principles of equality and mutual advantage in cultivating the above-mentioned business relations, as well as in its entire commercial GDR's scientific, technological and economic resources pravide excellent opportunities for further intensification of commercal

Maschinen-Export Supplies Equipment and Plant for Open-cast Mines

chinen-Export supplies open-cast mining machinery and plant for the extraction of lignite and other minerals, as well as equipment for lignite processing and briquetting. The firm also delivers know-how. machinery and equipment for cool transformation and for staring and handling bulk goods.

Commenting on the general feahigh quality and reliability."

2nd Proof: The steady contact maintained by expert technical and commercial personnel of Moschinen-Export's foreign representations with the firm's many customers in socialist countnes, developing and industrialized states of Europe, Asio, the Middle East and averseas, ensures that all valuable experience gathered from the use of exported products is taken into consideration. It also guarantees camprehensive services and expert consulting.

Open-cast Mines Abroad equipped mare than 35 large

Union, Poland, Czechoslovakio, Hungary, Bulgoria, Romania, Yugoslavio, Austrio- and Greece, Also delivered were:

70 boom stackers,

5 direct spoiling complexes,

Export ogreements have been signed for further large-scale deliveries of plant.
Beyond that, the rich experience liveries of plant. of GDR experts in exploring,

sits to be exploited through opencast mining has met with wide international recognition. Opening xisting mines in many countries including Yugoslavia, Polond, Hungory, Bulgario, Romanio and India were prepared and planned either by GDR experts alone ar in cooperation with the customers' planning institutions. Demand for Optimum

Techniques

future tasks in apen-pit technoloay calls for aptimum techniques to be applied. For example, in the Soviet Union nearly three-fourths of raw materials mined are to be won by strip mining under economic plans covering the period up to 1980. Considering the steadily deteriarating conditions of operation and eyer larger quantities of overburden to be removed, efficient extracting plant should be available. The GDR itself has mojor lignite deposits which have been intensely exploited for decades. This has led to the development of an effective damestic industry putting out all plant and machinery necessary for lignite mining, conveying and processing. The madern plant and heavy equipment mode by TAKRAF, enterprises, where the first bucket-wheel excavators were built as early as the twenties, have won acdaim throughout the world.

Today, the GDR is the world's largest lignite producer. At more than 30 open-cost mines some 250 million tons of row lignite are extracted annually, representing mare than 30 per cent of world production. This requires removal of about 1 billian cubic meters of overburden per year. Ta meet the great demands made an technology due to peculiar geological conditions, the country has set up design affices drafting the blueprints for giont machinery unporalleled in its dimensions, to be produced by a dynamic industry

Valuable experience gained over lang, years of solving related problems is being contributed to by GDR project planning and scientific institutions. The successes recorded and the know-how ready to be invested in new techniques, warront open-cast mining of lianite even with less profitable deposits, making the effort econamically justifiable.

Continuously Operating Mining Systems

At the mines of the GDR and countries supplied with TAKRAF plant, continuously operating extraction systems in porticular have won favor with the aperators. Designers have placed emphasis on the following four tech-

Combined truck conveyor sys-

Belt conveyonce Conveyor bridge operation,

 Direct spoiling. With all four techniques, GDR ex-

enced odvisers an special plant and open-cast mining equipment they have designed. However, belt conveyance and direct spoiling ore coming to the fore, as they offer superior effectiveness.

Belt Conveying Due to increasing use of large-

scale bucket-wheel excavators, belt conveying has been opplied to a growing extent. Plant and machinery can be adjusted satisfactorily to local conditions. This permits top results because the continuously excavated material con be transported further only by means of belt conveyors. But the use of the combination bucket-wheel excavator-belt conveyor-stacker has the disadvantage that the overburden must be carned to the waste dump ar another area farther off vio a chain of belt conveyors. For this reason GDR experts have focused their attention on developing techniques which sharten expensive conveyonce routes.

Direct Spoiling As the use of overburden convey-

ing bridges is not feasible at all open-cast mines, the direct spoiling technique has increasingly gained in importance in the GDR Above all, operating expenses are remarkably lower. It requires the combined use of bucket-wheel excavators and boom stackers, with the excovator pouring the overburden material directly anto the receiving belt of the stacker. Thus long routes to spoil banks are avoided. The bridging of the uncovered seam by means of long booms mokes extraction work easy and ensures a sufficient amount of mineral ready to be taken up. The use of the excavator-stacker-

o high degree af mobility, provid- ognitian of GDR products.

perts may be consulted as experi- ed that aperators are fomiliar with these giont plant. To facilitate this, TAKRAF enterprises and their suppliers have developed special equipment and flat-belt conveying systems which are up to the requirements of modem apen-cast minig. Their character-

> High effectiveness and aperational comfort,

Reduced weight/size ratio, with low investment and open ational expenses, Maximum adjustability to sur-

face conditions, high reliability, low wear, law maintenance costs,

Special consideration of surface-conditioned requirements with regard to graund pressure, fixing of slope angle during operation, and water content of the material mined. The open-cast mines equipped

thus far by TAKRAF and project plonning firms at home and obroad clearly testify to the trend. towards giving priority to belt conveying, a trend that is justifiable from the scientific-technical ond economic points of view. It con also be applied at mines which are being opened up and where there has been little or no experience so for in the use of that technique. Far it is apen-cast. mining that has enormously been boosted in the Soviet Union and other countries. Large deposits of lignite and hard coal, iron ore, bauxite, phosphate, sulfur, uranum and other minerals have been discovered in the Soviet Union, Indio, African States and Australio. A comprehensive agreement concluded between the GDR and Australia on the supply of efficient GDR-made mining plant is stocker combination, all three but one of many examples of inmaving on crawler treads, means ternational appreciation and rec-

Circumstances following the end of World War II were not exactly propitious. The ravages of wor were felt for more directly here than in the territary today occupied by the Federal Republic of Germany. The capacity of basic industry, only rudimentary to start with, in 1946 amounted to just 52 per cent of what it had been in 1936, while that of the metalworking industry had declined to 29 per cent and light industry to 44 per cent. There were virtually na raw materials worth mentioning and only a single antiquated steel works.

The visitor to the GDR today will see evidence of the dramatic change that has taken place, for modern industrial plants have mushroomed everywhere. By the end of the Sixties, an indigenous basic industry had been created as the basis for the GDR's traditional branches of toolmaking, textiles and precision mechanics/optics. Jaining them, such new branches of industry as data processing, control technology, semiconductor technology, plastics processing, chemical plant construction and power engineerina have been created from nil. Industrial production rose from 25 billion marks in 1949 (the year in which the GDR was founded to 300.5 billion marks in 1977, During the same period, annual national income increased from 22 billion to nearly 155 billion marks. With just one-fourth of the population, the GDR today produces twice as much as the former Deutsche Reich in 1936. For every 100,000 marks of national revenue, 30 employees were required in 1949, while today the figure is only 5: In ogriculture, one worker provided food for nine mouths in 1949; today the same worker olready feeds 32 people.

In its 30th year, the GDR now produces os many goods in just ane month as it did in all of 1949. In less than 50 days, as much no- till 1975, national income in-

oll af 1949. At present growth rates, it will be 8 times larger in 1980 than in the year of the GDR's establishment.

GDR industry Today Out of every 100 wage and sol-

ary corners in the GDR, 37 ore employed in industrial operations. Of every 100 marks of industrial output, 30 are occounted for by basic industry, 35 by the metalworking industry and another 35 by light industry and food production. Such branches as toolmaking and vehicle assembly, electrical/electronic engineering, scientific instrument assembly and the chemical industry, which are the prime determinants of scientific/technical progress, have experienced preeminent growth in recent years. Together, these industries account for more than 50 per cent of total production. In conjunction with the shift in production structure, there has been a significant trend towards concentration of production in the GDR. Over the past two decades, for example, the number of industrial aperations has been reduced from 20,000 to 10,000 while the number of jobs has been held essentially constant. Patent industrial cambines have been formed. of which there are currently 40. More than one-third of all blueand white-collar workers are employed in these combines.

Among the lorgest industrial enterprises of the GDR are Leuna-Werke (chemicals) with roughly 30,000 employees, as well as the "Ernst Thalmann" heavy machinery plant in Magdeburg, and the '7th of October" toolmaking enterprise with between 10,000 and 18,000 employees each. The industries of the GDR currently list combined machinery, plant and equipment assets valued at approximately 215 billion marks. Successful 5-year Plan-

Steady Growth The economy of the GDRplanned in 5-year incrementshas for many years been distinguished by steady growth rates. For a lengthy period now, national income and industrial goods production have risen by obout 5 per cent. The figures in 1977 were 5.2 and 5.4 per cent respectively, with plans colling far 5.4/5.7 per cent increases this

year. And prospects are good that these figures will be achieved by year's end. For the 5-year planning period from 1971

> supplied to Greece, Egypt, Algerio, Kuwait and Syria. of

ty of VEM products. Greece is but one of many European cauntries where VEM hightension plant has been installed.

Electrical Engineering Plant Exports Rising

Attentive observers of the GDR's foreign trade realize that export of industrial plant is increasingly taking an a central role. This is particularly true of electrical engineering plant, which is attracting more and more buyers due to its high technical standards.

In response to this development, the Elektrotechnik Export-Import foreign trade enterprise has recently geared its program to the export of plant and related fields. As a result, Elektrotechnik Export-Import has become one of the GDR's major plant exporters. it supplies:

 Turnkey power transmission and distribution plant

Control engineering plant Electric welding implements and automatic welding machines plus accessories (resistance arc welding and plasma

its production program ranges from individual tools to complete plant and includes all major products for all fields of mechanical engineering, for the antifriction bearing industry, vehicle construcfion and standard and formed component construction.

The industry affers hand, industrial and machine tools, automatic tools, production lines, numerically controlled machine tools, machining centers and complete industrial plant with a high proportion of machine tools for small, medium and large-scale series

All these products are exported by the WMW Export-Import foreign trade enterprise, of the GDR copital Berlin, WMW Export-Import maintains technical and commercial affices in over 20 counthe 100-billion-mark threshold for tries, joint marketing companies in the first time. A remarkable vol- a number of West European work of agents in more than 30 include:

German Democratic Republic is a sales service staff and specialists dominant economic branch, for assembly abroad. All this Comprising 60 enterprises and an guarantees reliable service comefficient research center, it emparing well with that of other leading producers. According to a 1977 survey by

American Machinist, the GDR ranked fifth among the world's mochine tool producing countries in 1976, ahead of such highly industriolized countries as Italy, Great Britain and France, On export of machine tools, the GDR was in seventh place, occording to American Machinist, a fact testifying to the high international appreciation of these products.

In this context, the production/export ratio is porticularly interesting. Of the cutting machines pro-duced in the GDR in 1976, some 84 per cent were exported. Main customers of the GDR's machine tool industry are the Saviet Union and the other CMEA countries. Supplies to Western Europe,

Scandinavia and a number of devetaping countries have likewise gained considerable importance and this trend is increasing.

Cutting machine exports to selectume, which will further increase countries, and an extensive net- ed non-socialist countries in 1976

Belgium/Luxembourg France **Great Britain**

> So far, the GDR has sold 220,000 machine tools to over 50 countries. The FRG, ane of the main non-sociolist buyers, over the post 20 years has purchased more than 60,000 machine tools which ore operating reliably at such companies as Hoesch AG, Daimler-Benz AG, Siemens AG, Monnesmonn AG, Rheinstahl AG, AEG and Demag.

20.3

26.3

14.0

Renowned enterprises in other West European countries which purchased GDR machine tools include, in France, Citroen, Michelin, Peugeat, Renault, Creuzot Loire, Usinor, Pant à Mousson, Arbel, France Belge and ANF; in ttoly. Fiat, EGAM, Riv-SKF, Falck and Dalmine; in Britain, GKN, Sykes, Motrix, Wickman, Ford Dagenham, British Steel Corp. and Modern Wheel Drive.

Electric Energy Plant on All Continents

Responding to an international in-vitation to tender bids, Elektro-section of the VEM production tars, transformers, electric technik Export-Import won a conmatars, induction and electroplat- tract for setting up a total of eight turnkey stations for Greece's new 400 kV power transmission grid. Since important producers of electrical energy are situated in the north of the country—they account for about 50 per cent of total energy output-efficient transmission plant had to be set up connecting the producers with the main consumers around Saloniki and Athens.

The first transformer stations were supplied as early as 1972, others were delivered recently. To meet this mojor export order, o number of complex technical problems resulting from contract specifications had to be solved. Besides the 400 kV stations, twelve 66 kV transformer stations, seven 123 kV tronsformer stotions, eleven 245 kV transformer stations and sixteen 420 kV tronsformer stations were exported to several countries in the post decade. Experts' reports and references youth for the serviceabil-

range, likewise of top international standard. They are manufactured at VEB Transformatarenund Röntgenwerk Hermann Motern (TuR) in Dresden, Its production includes AC testing devices for up to 2,250 kV and 5,000 kVA, impulse voltage testing devices for up to 7,000 kV and 620 kWh, and DC testing devices for over 2,000 kV and several hundred milliamperes. The production program of com-

plete series of HT testing devices for all kinds of valtage is complemented by corresponding measuring and control equipment, Delivery to the Scientific Research Institute for Direct Current in Leningrad of the world's largest and most modern HT testing laboratory is an example of the efficiency of the TuR enterprise. A model of this plant, which is of great impartonce for more rational transmission of high energy loads, was displayed for the first time at the 1978 Leipzig Spring Foir. Automation plant from the Ger-

mon Democratic Republic has other countries

also been purchased by custamers in many countries. The GDR's leading producer is VEF Gerate und Reglerwerke Teltow, which is highly experienced in designing, constructing, installing and putting inta aperation of automation plant for the power, chemical, construction and metallurgical industries, for agriculture, water management, air conditioning and road transport (traffic signals).

The enterprise also offers recognized know-how for the outomotian of conventional and nuclear power plant, for boiler cantral and heating plant. Such plants have been delivered to a number of CMEA states, Egypt,' Finland, Sri Lanka and many other coun-

Major export contracts have also been concluded regarding automotion plant for the chemical industry. Plant for all stages af manufacture, mainly in the petrochemical and fertilizer industries, ore operating in the Soviet Union, Poland, Hungary, 8razil, Yugoslovio and the Netherlands, among

Fitters from VEB Werk fur Signal- und Sicherungstechnik Berlin (WSSB) testing a cable along the Kotana, Syria, ralbouy line. The Berlin enterprise has equipped this and other lines in the Middle East with complete interlocking and telecommunication plant exported by the Elektrotechnik Export-Import foreign trade enterprise.

The Leipzig Fair — Interface of East-West Trade

"Exhibitors, economic experts, opportunities available in Easttrade afficials, technicians and scientists used Leipzig as a world trade marketplace to conclude ness people in West European important export and import countries, the USA, Japon and agreements, to establish new other nations. And they actively business contacts, to exchange a and regularly explait these apgreat variety of information and to make international capacity mind,1,500 exhibitors from 25 comparisons," says the closing report on the 1978 Leipzig Spring Fair. And indeed the approximately \$250 million contract concluded at this fair between the GDR Chemie-Impart-Export for eign trade arganization and the Dow Chemical Company of the USA for long-term mutual supply tries. At the Leipzig Spring Fair of propylene and propylene ax- (March 11—18, 1979) same of propylene and propylene axide is no mere trifle. This is but one example selected from a long list of commercial activities which demanstrate the far-reaching potential of the Leipzig Fair. What goals can a fareign firm set itself when deciding to exhibit in Leipzia? What opportunities present themselves for visitors, buyers and technical experts fram

One must realize, first af all, that the Leipzig Fair is the key fareign trade event of the German Democratic Republic, a country enjoying highly developed industry and simultaneously---thanks to its econamic structure—extensive international trade relations. At the Leipzig Fair, held twice yearly in spring and fall, ane can view the GDR's entire export range af capital and consumer goods and, an the other hand, gain the most comprehensive overview of its diverse import requirements. Knowledgeable foreign trade and industry representatives are available at every fair for negatiations and contacts with prospects and partners from obroad.

At the upcoming Leipzig Fall Fair (September 3-10, 1978) some 2,800 GDR fareign trade arganizotions and industrial enterprises will be represented as exhibitors. Their porticipation indicates the GDR's willingness to expand trade-including trade with copitolist countries—for mutual benefit. The 11 per cent increase in foreign trade valume targeted for 1978 in the GDR's national economic plan clearly indicates the scope of opportunities available far foreign exhibitors and buyers at this year's Fall Foir, i.e. far both exporters and importers. While discussion thus for has con-

centrated on doing business with porticipants of the Leipzig Fair need not be restricted solely to the GDR. As virtually all exhibitors from Western Europe and averseas who have olready frequently token port in this fair realize, a carefully planned presence in Leipzig can well serve in lieu of a costly, time-consuming business trip through several socialist cauntries. Here, as at na other fair, the GDR and all CMEA member countries, as well as Yugoslavia and other socialist nations, are represented by their leading foreign trade organizations with a complete and comprehensive range of products. In Leipzig you can sell to the most remote corner of Mongolio, a British export magazine aptly observed recently.

The Leipzig Fair serves as a center of East-West trade, which currently enjoys a growth rate higher than that of world trade as a whole. Trade by CMEA countries with the capitalist industrial nations, for example, increased nine-fold from 1969 to 1976. The

West trade have been perceived by alert, realistically-minded busiportunities in Leipzig. With this in capitalist industrial countries and West Berlin will participate at this year's Leipzig Fall Fair. Altogether, mare than 6,000 exhibitors from 50 nations have registered. Over half of them come from abrood. Visitors are expected from approximately 100 coun-9,000 exhibitors from 60 countries will be represented. And here, as at every Leipzig Spring Fair, the participation of approximately 20 developing nations with afficial collective exhibits will attract the special interest of visitars to the fair. These figures reveal the world-

wide estimation of Leipzig's value

as an international marketplace, The Leipzig Fair is a virtually ideal event at which to study supply and demand an the world market, to become familiarized with innovations and advances in all industrial production fields, and to abtain insights into competitars' lines. Net exhibition space will be 280,000 square meters at the Fall Fair, 340,000 at the Spring Fair. The entire range of capital and consumer goods is clearly subdivided by branches. with a considerable number of them camparable to specialist fairs as regards international participotian, quality of the merchandise displayed and actual exhibitian space. At the 1978 Leipzig Fall Fair, for example, the chemical sector will be represented by exhibitors from 25 countries in chemistry, chemical plant and plastic machines branches, including the key foreign trade organizations of the GDR, the USSR, Poland, Czechoslovakia, Hungary, Ramonia, Bulgaria and Yugoslavia, os well as the major chemical concerns of western Europe and the USA. Textile and shoe machinery will be displayed by exhibitors from 20 countries, on-road vehicles and medical technology by exhibitors from 15 countries each. Also enjoying heavy international representation are the 20 branches of the consumer goods fair including textiles and garments with firms from nearly 30 countries, food and semiluxuries from 35 countries, glass and ceramics as well as leisure and sport articles with exhibitors fram 15 countries each. At the Spring Fair, international emphasis in the capital goods sectar is an metallurgical products, heavy machinery and plant canstruction, machine tools, electrical engineering, automation technology, information technology, scientific instrument assembly, as well as agricultural and food technology and packaging.

Delivering a practical blend of merchandise, know-how and service, every fair features a

scientific/technical pragram comprising symposia and scientific conventions with the participation of experts from the GDR and abroad, as well as display-related special lectures. This program, as well as a special service, supports the information activities of the technically-oriented trade visitor and helps facilitate purchase decisions, thus enhancing the commercial value of the Leipzig

machines as well as to extruders

and foaming machines. The so-

cialist countries are the main

buyers of plastics and elastomer

processing machinery from the

GDR. Porticipation in internation-

al trade fairs and technical exhi-

bitions such as those in Birming-

hom, Gothenburg, Algiers, Bagh-

dad and Tehran, however, has

attracted o growing number of

business people to plastics ma-

chinery from the GDR. The facto-

ries of which these mochines are

produced have been expanded

and POLYGRAPH (R) Plant

which was awarded a Gold Medal at the 1977 Leipzig Fall Fair. Printing speed has been increased from 7,300 to 8,000 sheets per hour, while noise level was reduced to 88 dB.

The range of internationally renowned ORIGINAL PERFECTA high-speed cutting machines has also been enlarged by an advanced design, the SEYPA 115-1. This automatic trimmer features 46 advance pragrams plus 46 advance-and-runback reversal programing trocks, and is fitted with a separate computerized DRG (Digital Reset Generator). This cuts setting-up time by between 50 and 80 per cent and permits full utilization of the highest cutting speed.

Plastics and Elastomer **Processing Machines**

The GDR's plostics and elastomer processing machinery industry has olways geared itself to the most advanced design principles. The unit construction system for individual product groups has been enlorged with every new year, resulting in a greater operational range and higher efficiency of the machines.

ond modernized so as ta meet growing demond. In this field, too, interest in complete plant has been expansive. Last year, a contract was signed with the Republic of Guinea-Bissou for delivery of a complete plant far household products made of thermoplastic material. The GDR's range in this field is especially interesting to countries which have their own raw moteria resources.

Licenses and Know-how UNITECHNA also deals in technico-scientific know-how. This indudes technical documentation for the construction of plastics, elastomer and printing machinery, as well as process data.

Complete Plant and Production Lines

The machine tool industry of the Products of major importance GDR has a recagnized patential in the field of plant export as main acceptor of arders and portner in cooperation. On the international market, the industry's products ore increasingly included in multilateral solutions af technological problems, in the supply and outfitting af production lines and plant.

Export of complete plant by the GDR's machine tool industry is implemented via the WMW Export-Impart foreign trade enterprise. Products of this industry are delivered by VEB RAWEMA, which is part of the renowned Fritz Heckert machine tool combine, both based in Karl Morx Stadt. RAWE-MA represents virtually the entire potential of the GDR machine tool industry, other branches of the metalworking industry, and major capacities in the construc-

tion and assembly fields With the export of complete plant assuming ever greater mportance, this centralization of order acceptance is praving increasingly successful. Customers from many countries appreciate the advantages which a singlesource acceptor af orders offers for commercial, legal and technicol aspects of the transaction.

RAWEMA is the chief supplier of advanced industrial plant for mechanical engineering, vehicle and apparatus construction. Its staff has gathered vast experience in designing, delivering and putting into operation of plant featuring high technical standards. RAWE-MA is also active in the field of reconstruction and extension of existing plant, covering design, delivery and service.

Over the past few years, RAWE-MA has set up complete plants in Yemen, Yugoslavia, Vietnam and Iraq. During the same period, it built a number of major metalworking factories and modernized existing ones at home.

From the production range of the GDR mochine tool industry and its chief supplier, RAWEMA. WMW Export-Import offers plont for maintenance of vehicles, farm and construction machinery as well as metalworking equipment and training workshops for vocational and advanced training.

include:

Plant for manufacturing gears for machine tools and motor vehicles with an annual capacity of 250,000 to 350,000; Repair plant for road can-

tor vehicles with an annual capacity of 1,500 to 2,000; Plant for machining fingers for moving machines with an

annual output of 4 million; Repair plant for water pumps of various types with an annual capacity of 600 to 1,000:

Technical equipment for metalwarking, engineering, workshops, tool and chuck construction, repair shops for mechanical engineering. cement plant, steel and rolling

Repair plant for agricultural machines and vehicles with an onnual capacity of 350 ta

Warkshaps for practical and theoretical training of skilled metalworkers with between 500 and 1,000 places.

These and other products range from simple plant with bosic mochines and equipment to highly automated and advanced equipment for rational production. The delivery of industrial plant in any case includes such necessary engineering services as sub-contracted assembly, assistance in the initial phase of aperation, personnel qualification, as well as prophylactic and operating service. Besides acting as chief acceptor

of orders and chief supplier of complete plant, the GDR's machine tool industry is increasingly accepted as a partner in cooperation in the international plant export business. The supply of individual and special-purpose machines as well as complete production lines is only one of o wide range of cooperation opportunities. The realization of export orders for plant for third countries, in which the GDR is coaperating with West European firms toa, as well as a series of pramising negotiations with partners from the non-sociolist econamic region, hold out bright

prospects for such expart transac-

Well-known on Many Markets: TRUSIOMA The UNITECHNA foreign trade est developments at international

enterprise exports products of two major GDR industries: Paper and printing machine construction, and plastics and electomer machine construction. The machines, units and plant designed and built by these efficient branches—with such highly regarded trademarks an international markets as POLYGRAPH

and TRUSIOMA (R)—have proven their ments worldwide. In the past few years, UNITECH-NA's export activities have been increasingly focused on the supply of complete plant. The enterprise thus meets the growing interests of its partners all over the world in purchasing ready solutions from single units to entire mochine systems.

UNITECHNA maintains offices in 30 states on all confinents, while more than 100 agent firms provide professional_advice, quick supply of spares and excellent

trade fairs and exhibitions.

The VEB POLYGRAPH Central Designing Office, a specialized enterprise, designs, delivers and erects on the same principle. This specialized enterprise has so for set up or modernized over 100 printing and bookbinding plants. GDR-designed printing shaps for newspapers and magazines, maps and securities ore operating in Egypt, Algeria, Sudan, Iraq, Burmo, Brazil and other countries. On July 1, 1977, the most advanced printshap in Latin America was inaugurated at Guantanamo, Cuba. Only 20 months elapsed between signing of the contract and inauguration of the facility, which has an annual copacity of 23 million books, newspopers and magazines.

In Keralo State, India, construction is under way of a printshop for schoolbooks with an annual output of 15 million volumes. It is the second shop of this type India has purchased from the GDR. The first was inaugurated in Patna, Bihar State, in 1972 and has an annual capacity of 10 million

New and Advanced Designs of the GDR Printing Machine Industry

The GDR has quickly reacted to the international trend of introduring the web-fed offset technique into newspoper and magazine printing, and has became a trendsetter itself. The proven ZIRKON 66 web-fed

offset printing press has been redesigned. Besides printing newspapers and magazines, the advanced ZIRKON 66-II version is suitable for printing advertising pomphlets, catologues and books. Main customers for ZIRKON presses include Sweden, the FRG and the USA, which so for have imported over 500 of these machines. The RONDOSET PETIT is another

ed for medium circulation and meets demands for more rational production with lavish illustration, including color photographs, af dailies. The ZIRKON and RON-DOSET PETIT presses can also be used for cardboard printing.
The YEB POLYGRAPH line further includes a wide range of sheet-

sophisticated design. It is best suit-

fed affset presses such as the PLANETA-VARIANT 64-3 SW 2, a size 4, six-color perfecting press This applies to injection moulding

Crucial to Government

Italy Plan Sees Stable Growth

By Robert J. McCartney

ROME, Sept. I (AP-DJ) — Italian Premier Giulio Andreotti is staking the future of his sevenmonth-old government on the success of a dew long-term economie plan aimed at "growth with stabili-

The premier will meet Monday with representatives of the nation's five major political parties to open a crucial debate on the plan, copies of which were released late yester-

day.

The lengthy study proposes a package of government investments to create jobs, but it also proposes cuts in social-welfare spending as a step to curb inflation. It emphasizes that Italy must correct ceriain forms of "structural instability" in its economy, particularly by trimming the public-sector deficit and containing wage increases.

could well be the issue on which his try's underdeveloped south. government stands or fails

imming the phone-sector delicit power.

nd containing wage increases. When asked if his party would consider withdrawing that support.

Japan Economic Growth Seen Below 7% Target

By Henry Scott-Stokes

lowing Japan's announcement that growth for 1978 would probably not exceed 4.5 to 5 percent, far below the 7 percent that Premier Takeo Fukuda said at the Bonn summit

meeting that Japan would achieve. Thus Japan, which has been un-able to fulfill international pledges to reduce its trade surplus, is again likely to fall far short of its public undertaking. But officials here said that this was not Japan's fault.
"If it had not been for the fall of

the dollar, we would have been all right," a Finance Ministry spokesman said, "But as it is, we are helpless; we alone can't stop the dollar from dropping and it's sucking the life out of our economy."

The 4.4-percent annual growth registered in the latest quarter gives Japan an economy that is about half the size of that of the United States. In order to meet the 7-percent growth target for the year, the Japanese economy must grow at a rate of 8.2 percent on an annual basis for the rest of this fiscal year, ending in March, 1979.

Still Target

This is still the official aim of the government, according to Economc Planning Agency economists. And this target was reasserted at a Cabinet meeting presided over by Mr. Fukuda carlier this week.

But officials concede privately that stepped-up government work programs and other measures, scheduled to be announced tomorrow and likely to be worth over 1 percent of the GNP, or about \$12.5 hillion, will not have much impact

within the year.
Officials of the Ministry of International Trade and Industry have pushed within the government for a much bigger shot in the arm to the economy, noting that the growth rate is falling sharply and that first reports for the second quarter ending in four weeks are also depress-

But the Finance Ministry has refused all such pressures, arguing that Japan's budget is already li-nanced to the extent of 37 percent lie-sector deficit of about 37.6 tril-lion lire (about \$45 billion) next ber Luca Pavolini said: "We don't year, up from an expected 33.5 tril-want to stand with pointed rifles,

Mr. Andreotti's Christian Demo-

larly in the field of the economy," he said. Without such progress, the government could lose the support of the Communists, whose votes in parliament to remain in needs in parliament to remain in

TOKYO, Sept. 1 (NYT) — Following Japan's announcement that spending and therefore the borroweconomic growth in the April-June ing requirement would be to stimu-quarter was only 1.1 percent, exquarter was only 1.1 percent, ex-perts here said that the nation's irresponsible. "The borrowing need is equiva

lent to about 9 percent of our GNP already," a Finance Ministry spokesman said, "To step it up much further would defy common The government is left in the po-

sition of propping up growth in Japan, while business falls back, uncertain about prospects and unwilling to invest. Export earnings dropped by 3.5 percent during the April-June quarter and are expected to fall again in the current quarter.

Whereas the external sector ac-counted for about one-third of the growth in the January-March period, in the next three months external transactions had a negative impact on the economy, Finance Ministry officials said.

Meanwhile, the government re-ported that Japan's July unemploy-ment fell to 1.15 million from 1.26 million in June but was up from 1.05 million a year earlier, putting the seasonally adjusted jobless rate at 2.34 percent, down from 2.39 percent in June, but up from 2.16 percent in June, but up from 2.16 occupies a year earlier.

Over the 1979-81 period, the government estimates, its plan would ereate between 500,000 and 600,000 occupioss. In addition to its own occupies the purpose it expects to

After the initial session on Mon-"The central political question day, party representatives are we concerns the actual capacity of scheduled to meet again with Mr. a government to operate," said Andreotu on Sept. 7. The government ment is required by law to submit an economic program in some form to parliament by the end of Sep-

Union Approval Needed

The plan will have to be approved by Italy's powerful labor unions as well as by parliament. Initial union reactions to the plan to-day were cautiously critical, and generally suggested that the government had not offered much that was oew, "Frankly, I had hoped that the government's plan would be more serious," said Elio Giovannin, a top official in the General Confederation of Italian Labor. "It's just a series of measures to re-duce workers' incomes and public spending."

The program was originally sup-posed to have been a comprehen-sive plan for the Italian economy over the next three years, but it concentrates in detail almost exclusively on 1979.

As expected, the plan proposes a reduction of 6.1 trillion lire in next year's public-sector finance requirement, which corresponds roughly to the public-sector deficit.

The legis of the 1079 budget is to

The logic of the 1979 budget is to increase investments at the expense of consumption, allowing, in theo-ry, economic growth without adding to inflationary pressures.

Consumption would thus be reduced by spending cuts and tax increases totaling 8.35 trillion lire, while appropriations for public investments would be increased by 2.25 trillion lire to contain the containers. .25 trillion lire to create jobs. The most controversial proposals for spending reductions are those of 2.4 trillion lire for pension payments and 1.5 trillion lire for health

appropriations. **Additional Revenues**

Additional tax revenues of 2 trillion lire are forescen, but they may result from more efficient collec-tion methods rather than new lev-

The Bank of Japan reported that funds for this purpose, it expects to the average interest rate of loans have loans available from the Inter-

The study emphasizes that Italy's labor costs, which have increased about 70 percent since 1970, cannot increase in real terms if the plan is to succeed, but the government did not propose any specific measures to curb wage rises.

The government also implied that it might join the European The decline was in sharp contrast Monetary System proposed at a to July's rise of \$2.035 billion. FINANCIAL NEWS AND NOTES

Pratt & Whitney Gets United Order

United Airlines awarded its \$200-million engine contract to Pratt and Whitney Aircraft because the engines were more flexible and cheaper to operate, United says. Robert Collins, vice president of engineering at United Airlines, says the contract awarded to P & W, the largest sale ever for the company, followed an eight-month study of P & W, General Electric and Rolls Royce engines. One of United's major requirements was the possibility that the airplane might become larger, he said, and "the Fratt & Whitney engine has more growth potential than GE. That turned out to be a major consideration." Without major modifications, the thrust of the GE engine is "stretched right to its limits. The thrust levels of Pratt and Whitney has a little more capability." He said operating costs for P & W were less per hour than GE, and although the GE engine was cheaper with fuel, the P & W engine used fewer costly spare parts. He said the Rolls Royce engine was out of the running early because United already uses P & W and GE engines and saw no reason to add a new engine to its fleet.

Japan Color-TV Output, Exports Up

Japan's color-television-set production in July rose 1.7 percent from the prior month to 776,000 units, but was off 5.8 percent from the previous year, the Electronic Industries Association said. Exports surged 40.4 percent to 374,489 units from the previous month and were up 2.5 percent from a year earlier. Overall shipments totaled 707,000 units, up 4.1 percent from June, but down 0.6 percent from the year before. Meanwhile, two Japanese companies, Unitika Ltd. and Toyota Motor, say they are send-ing separate missions to China. Unitika, a major synthetic fiber maker, is sending an eight-member

group for about two weeks at the invitation of the China National Textile Spinning and Weaving Soci-ety to promote technical interchange between the Japanese and Chinese textile industries. Toyota is sending four representatives for a two-week visit to negotiate the sale of trucks and buses.

Mannesmann Earnings 'Positive'

Mannesmann AG says its first half external sales climbed 6 percent to 5.327 billion Deutsche marks from 5.006 billion DM a year earlier. The company added, without giving figures, that earnings in the first half were "in total, positive." In a company publication, Mannesmann said that order inflow and production had climbed as well as turnover. Foreign sales share of external turnover elimbed to 59 percent from 52 percent.

Congress Demands Firestone Recall

A Congressional panel called on Firestone Tire & Rubber to replace free of charge all steel-belted radi-al 500 tires still in use to eradicate "an unreasonable rise of continuing accidents, injuries and death." The demand was made in a report of the House Commerce Committee's oversight and investigations subcommittee following a lengthy investigation that included four days of hearings this summer. Meanwhile, oegotiations with the government over tire recalls involve more tires than just the company's 500. The talks stem from the National Highway Traffie Safety Administration's insistence that Firestone recall the '500.' But whether to also recall a similar tire, the TPC Original-Equipment Tire made for General Motors, is a key element of those talks, Joan Claybrook, the agency's administrator, says. Firestone produced nearly 17 million of those tires. compared with about 23.5 million 500s.

Sky Seems the Limit for Boeing Sales

benefiting from surging passenger traffic, line up to purchase n new generation of quieter and more fuel-economical planes that they hope will see them through the 1980s.

Analysts estimate that Boeing ac-counts for 70 percent of the dollar sales of jet aircraft to U.S. airlines, and for between 60 and 65 percent of sales worldwide.

Latest Example

Yesterday's announcement that Eastern Airlines and British Airways have placed orders for a total of 40 of the new 757s—a narrow-body jet seating 150 to 180 passengers—at a cost of nearly \$700 million, is only the latest example.

This is the second new aircraft

This is the second new aircraft NEW YORK, Sept. 1 (IHT) — crease of 2.6 percent in June to an New York Stock Exchange prices upward revised figure of \$203.3 billion and a 17.3-percent rise from program Boeing is embarking on In July. United Airlines placed

the \$176.4-billion rate of July 1977. Previously, the department reported that the June increase was I.I the initial order for the 767, a widebody, short-range jet capable of carrying up to 300 passengers. The order for 30 of the airliners at a total of \$1.2 billion represented the biggest single order in aviation history. It was capped by an additional order from United for 30 Boeing 727-200s at a cost of \$400 Active UAL Inc. rose 21/2 to 42. million

And within the next few months, Bocing is expected to announce yet Agency to Probe a third new aircraft program, the 777, which is a three-engine version of the 767, providing the airplane with an intercontinental range of 4,500 to 6,000 miles.

The announcement will depend on a probable order from American Airlines, which is considered likely DJ) - The Department of Justice to buy between 20 and 30 of the new craft, which will carry a price-tag of \$35 million to \$40 million

No other aircraft company in the jet era has had the boldness to bring out two new airplanes at the same time, let alone three, and Boeing must lay out a staggering \$4 billion in start-up and development costs over the next few years to car-

But acrospace analysts believe

ing by leaps and bounds as airlines, that Boeing has the financial wherewithal and customer base to pull off what is in effect a preemptive strike that is leaving its major competitiors, McDonnell-Douglas, Lockheed and the European Airbus

Industry sitting on the runway.

Adding to the company's strength is the fact that its current airplanes continue to sell well. Sin-gapore Airlines in May placed \$900 million in orders for 13 747s, and six 727s.

"There's no way they can be dislodged," said Alan Benasuli, aerospace analyst with Drexel Burnham Lambert.

Simple Key

"The key to their success is very simple," he added. "They have a complete product line, which nobody else has. And they already have planes with 90 percent of the airlines in the world. So they have an enviable customer base. And if an airline reorders, other things being equal, they are going to reor-

der Boeing."
Financially, Boeing is in good shape to tackle its ambitious three-pronged program. It has about \$1.3 billion in cash and more than \$1 billion in shareholders' equity. Sales for 1978 are expected to approach \$6 billion, and the order backlog at midyear was \$6.9 bil-

45-Percent Gain In the first six months of 1978.

Boeing posted a 45-percent increase in earnings to \$122.7 million or \$2.88 a share, Mr. Benasuli projects earnings for all of 1978 at \$7.25 a share, up from \$4.24 a share or \$180.3 million in 1977. The Drexel Burnham analyst

predicts that earnings will continue to increase in the next few years reaching between \$10 and \$11 a share in 1980. Then he sees a terr porary drop between 1981 and 1983 as "research and development and general and administrative expenses go up dramatically at the same time that their revenues from current planes will be coming

- The U.S. unemployment rate fell to 5.9 percent of the workforce in August, with much of the improvement occurring among women and teenagers, the government reported

Jobless Rate

In U.S. Fell

From July's 6.2%

Page 11

today.

Total employment rose by 156,000 persons last month to 94,6 million, the Labor Department said. The 5.9-percent jobless rate compared with 6.2 percent in July and June's 5.7 percent — a fouryear low.

The August johless level was exactly on target with President Carter's year-end goal.

Here is an unemployment break-down of each category of the population: • Adult men: 4.1 percent, un

changed from June.

• Adult women: 6.1 percent. down from 6.5 percent. Teenagers: 15.6 percent, down

from 16.3 percent. Whites: 5.2 percent, down from 5.3 percent.

• Blacks and other minorities:

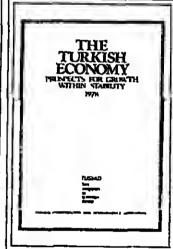

11.7 percent, down from 12.5 per-• Full-time workers: 5.5 percent.

down from 5.7 percent. One of the more positive developments in the government report was the relatively sharp drop in black unemployment. The 11.7-per-cent rate — down from July's 12.5 percent — was the lowest since No-vember of 1974 when it was 11.6

percent. The department also reported that the average bourly earnings of workers in the nonfarm category rose 0,2 percent in August, but a reduction in weekly workers hours pushed overall weekly earnings down slightly. Still, average hourly and weekly earnings have risen 8.7 and 8.4 percent, respectively, since

last August, the department said. Over the past 12 months, employment has grown by almost 3.6 million persons.

Jakarta Extends Caltex Contract On Oil Sharing

JAKARTA, Sept. 1 (Renters) -Indonesia has abandoned plans to and over concessions of Caltex Oil Co. to Pertamina, the governmentowned oil company, and instead has decided to extend Caltex's production-sharing contract for 30 /ears, a mining ministry spokes-

nan said today.

Caltex is the joint venture of standard Oil of California and l'exaco.

The spokesman said the decision anina was unable to finance the exploitation of Caltex's concession treas in the Riau Islands off Singafore. The present contract with altex, which was due to end in 983. will now expire in 2013.

The Indonesian government re-ies heavily on Caltex, the biggest il company operating here with he daily production of about 50,000 barrels, nearly half of ndonesia's total output.

The government move was seen tere as a sign of Pertamina's finanial weakness in the face of governnent plans to "Indonesianize" forian oil companies, observers said.

a surplus of £289 million last year

the first time since 1972 that the £1.709 hillion last year, the sixth yearly deficit in a row, down from a

> The revisions were contained in the government's annual "pink book" detailing the trade perform-ance of the United Kingdom over the last 10 years.

The capital account swung from a deficit of £2.5 billion in 1976 to a surplus of £7.1 billion in 1977. Net overseas earnings of the City

of London, the nation's financial center, totaled £1.747 billion, slightly below the £1.836 billion of the year before. Most sources of income in fact, increased between 1976 and 1977, the government said, but earnings from commodity trading of £109 million were about half the previous year's figure. There was also n sharp decline in net interest received by banks from overseas because of a narrowing of the margin between borrowing and lending rates in the Eurocurrency

market, it said. Net earnings from insurance in 1977 rose by £100 million to £909 million. Total earnings and costs of sea transport were nearly in balance and civil aviation provided a surplus of £244 million.

Tourists and other foreign visilast year, almost double the £1.102 billion that U.K. residents spent ahroad. The net contribution of travel to the balance of payments went up to £1.077 billion last year

LONDON, Sept. I (AP-DJ) - called invisible trade in areas such uted £958 million to the current account against a deficit of £323 million in 1976. On capital account, the net contribution widened to £1.349 billion from £1.192 billion. Economie aid in grants to devel-

> Net purchases of governmen bonds by nonresidents amounted to £979 million, up from a £116million surplus in 1976 and a 1975 deficit of £13 million. The sale of foreign-currency bonds, forward sales of oil by the British National Oil Corp. and borrowing by other public corporations led to overseas myestment into the U.K. public sector of £1.203 billion, compared

ly £1.5 billion last year, compared with a rise of £269 million in 1976.

MEXICO CITY, Sept. 1 (AP-DJ)

— President Jose Lopez Portillo
said today that Mexico's proven pe-

China Oil Refining Up

from £627 million.

The value of oil and natural gas sales contributed £2.543 billion to Britain's trade in 1977, up sharply from £903 million a year earlier. After deducting payments for the import of goods and services related to North Sea development and interest, profits and dividends due the contribution of the services related to North Sea development and interest, profits and dividends due the contribution of the services related to North Sea development and interest, profits and dividends due the contribution of the services related to North Sea development and interest, profits and dividends due the contribution of the services related to North Sea development and interest. abroad, oil and gas directly contrib-duction figures were given.

The Value Line brings you HARD FACTS ON 1700 AMERICAN STOCKS

The Value Line Investment Survey covers more than 1700 American stocks, which account for over-90% of all dollar trading volume in U.S. equity markets. With The Value Line Survey, you have objective evaluations -updated every week-of just about any American stock that's likely to come to your attention.

Every three months, on a regular schedule, Value Line presents a new full-page report on each stock, packed with vital deta, including 22 series of key operating and finencial statistics going back 15 years and estimated 3 to 5 years aheed. Then, for each stock-every single week-Value Line updates the Price, future Performance and Sefety ranks, Appreciation Potential, Yield,

end estimated Earnings end Dividends. This information will enable you to assess a stock's prospects based on hard financial facts. As a special Introductory offer, you can receive 12 weeks of Value Line for only \$45, providing you have not had a subscription in the past two years. As a BONUS, you will also receive Value Line's 2400-page Investors Reference service with the latest full-page reports on over 1700 stocks, together with the 64-page guide, "Investing in Common Stocks." Send payment (no cash please) elong with name and address together with this ed to Dept.

senior executives \$ 30 - \$ 100.000 +

you are a top executive and you are thinking about reorientating your career, the ecision to "put yourself on the market" is often n serious one. It can mean diverting much time and effort from your present joh, which can also endangered. And it means sitting on the less comfortable side of the interviewing

One way is in do the round of the Executive Search Consultants. But you would much rather that they were looking for you. Another is in answer the "executive opportunity" advertisements. But you know that most of the jobs that would interest you are not advertised. And anyhow, there is a risk

Now, there is another way. You can subscribe, in full security, to the International Executivn Search Newslefter.

\$ 30,000 or equivalent and upwards

Throughout the year, an average of more than 300 executive opportunities with salaries of between \$30,000 and \$100,000 + or equivalent are listed. None of these are published elsewhere. The information is supplied to us, at no charge to them, by reputable Executive Search Consultants all over the world.

If any of these opportunities interest you, you simply write to us. We then inform

The advantages of this method are obvious. Security is total, just as in direct dealings with a professional Consultant. Until a serious opportunity occurs, the only time and effort required is reading through the newsletter at home. And when the right opportunity does come, it is the Consultant who contacts you. Even if your present career is reasonably satisfactory, it does oo harm to keep in touch with possibilities and remunerations outside. Just send us the amount of the subscription (10 issues per year) with your personal visiting card.

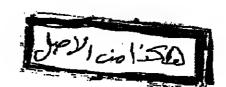

Subscription rates: Belgium - BF 2900; Canada - \$C (35; France - FF 300; Netherlands - FL 200; Sweden - KR 400; Switzerland - SF 160; United Kingdom - £ 48; U.S.A. - \$ (20; West Germany - DM 185; other countries - FF 500 or \$ 120.

BOOKS

WOMEN IN RUSSIA

Warshofsky Lapidus, Stanford. 410 pp. \$18.75. THE WOMEN'S LIBERATION MOVEMENT IN RUSSIA

Feminism, Nihilism, and Bolshevism, 1860-1930 By Richard Stites. Princeton University Press. 464 pp. \$37.50. Paperback \$12.50.

Reviewed by Susan Jacoby

coostruction. The least skilled and lowest paying jobs - hauling constructioo materials around in wheelbarrows, mixing mortar and plaster, cleaning up the mess left by other workers - were done entirely by women.

One of the wheelbarrow-pushers was a woman who appeared to be to her early twenties. You couldn't really see what she looked like during the day but at quitting time she would pull off her gray cap, take out a small hand mirror, wipe the grime off her face with a handkerchief and carefully put oo lipstick She was going home to a man of course: I knew that oot only because of the trouble she took with her appearance but because she always rushed away from the coostruction site with two large shopping bags dangling from each arm. Buying food, like pushing wheel-barrows, is woman's work in the Soviet Union.

As I read these two books, I kept asking myself what they had to do with the lives of ordinary Russian women. The answer is: not enough. For anyone who is interested in either women or Russia, there is a good deal of valuable, previously untranslated information in both volumes. All of the contributors know their subjects well (these range from women in the medieval state of Kievan Russia to laws concerniog sexual behavior today), and many have a firsthand knowledge of Russian life that saves their articles from academie dryness.

Nevertheless, the essays strike notes that are curiously disconnected from modern reality. (This criticism is directed mainly at "Women in Russia," which is concerned primarily with the present, rather than at Richard Stites book, which deals largely with the past.) What is missing, I believe, is feminism—not feminism as a doctrinaire, monolithic creed but feminism as an essential intellectual tool for analysis of the coodition of women io any part of the world.

There is an irritating tendency on the part of many (though oot all) of the cootributors to treat feminism as a pesky foreign gnat, to be men-tioned and then brushed away because the Soviets themselves regard 'women's problems" as relatively minor matters requiring adjust-ments within the system rather than as serious inequities arising from basic sexual and economic relationships between men and wom-

Jerry Hough, in an essay on women's issues in Soviet policy debates, asserts that "in trying to explain the absence of a strong feminist movement in the Soviet Union, we should consider the pos-sibility that Emitations on free discussioo in the Soviet press have

Edited by Dorothy Atkinson, Alexander Dallin and Gail

DURING the two years I lived been a much less significant factor in Moscow, I would look out the window of my study each day sure to . . . the difficulties protocelle to eheck on the progress of an apartment building that was under busbands and wives into the job market." Hough correctly concludes that

Russian wives and mothers, oo the basis of their backbreaking experishare th feminist concept of work as a liberating force in women's lives. But his observations do oot supply any reasonable explanation for this 0 pbenomenon.

Soviet society does oot offer its women what any Western feminist would consider a serious choice about work. In the Soviet Union, a married woman can stay home with N her children and experience the ma-jor economic hardship of living oo one low Soviet income as well as M. the strong social disapproval direct- D. ed at anyone who does oot have a paying job. Or she can go to work in a factory or office and have, in reffect, two full-time johs. In her unpaid joh at home, she can expect P little help from her hushand or sfrom Soviet society.

This is a feminist issue - an issue involving the lack of value I placed on "women's work" and the R fact that women have little power over political and economic decisions affecting their lives. It cannot be understood or explained simply as an internal Soviet policy ques-

tion. Several contributors mention that the Soviet Uoioo's disregard of consumer needs is particularly hard on women, but they do oot coovey a sense of how bad the situation really is. Here is a partial list of consumer items that are either conexistent or available only to a politically connected elite: tampons, hirth cootrol pills, diaphragms, IUDs, washing machines (in individual apartments or in the basements of apartment buildings), disposable diapers, laundry and/or diaper services, baby food and formula, alu-minum foil, scouring powder. The lack of such items may be due in part to the Soviet Union's heavy military spending. But could it also be related to the fact that there are almost oo women in positions of power on economic planning coun-

Each of these books includes some outstanding material that does face "the women's problem" directly. They include Richard Stites chapter oo changing sexual mores in the 1920s; Beatrice Brodsky Farnsworth on Bolsbevik attitudes toward the Soviet family; Janet G. Chapman on equal pay for equal work; Joel C. Moses on womeo in politics, Colette Shulman on the relationship between individuality and collectivism and Alfred G. Meyer on Marxism and

Susan Jacoby is the author of "Moscow Conversations" and "Inside Soviet Schools."

WELL, I FINALLY GOT UP NERVÉ TO CALL THAT LITTLE RED-HAIRED GIRL, BUT I DIALED MARGE BY MISTAKE AND GOT A DATE WITH PEPPERMINT PATTY...

NOW THERE'S THE MARK OF A REAL PRO. HE'S REFERRING TO HIS "LITTLE BOOK" FOR THE YARDAGE HE MARKED OFF DURING HIS PRACTICE ROUND.

LET'S SEE, WAS THIS THE TOWN THAT HAD THE SWINGING WAITRESS AT THE MOTEL OR WAS IT THE NEXT STOP ? ...

THAT'S WHY

Top English Star

Cricket, for Boycott, Is Serious Business

Lord's cricket ground looked like a and appearance. It is not proper to football mob swarming onto the field. T-shirts. Beer cans. Funny

hats. Chanting.
"Englaod!" clap-clap.
"England!" elap-clap. "England!"

clap-clap. England's players strode up to the gallery to acknowledge their triumpb over New Zealand in their last test match of the summer. As they stepped forward one at a time, a terrific cheer went up for Geoffrey Boycott, the man many consider the world's greatest cricketer. It made oo difference that he had just finished his worst performance of the summer. The crowd loved him.

Sedate Snobbery

Meanwhile, a smaller crowd stood apart, behind the railing of the Marylebone Cricket Ciub's carefully guarded pavilion. The Marylebone club is the world arbiter of cricket and the game's most impenetrable institution. No cheers for the ebampion came from that

The cricket establishment has litthe more use for Geoffrey Boycott than it has for the noisy crowds who have disturbed the game's serenity in recent years.

It is not merely that this

Yorkshire miner's son is nnt a gentleman to what was once entirely a gentleman's game; a lnt ni players are oot gentlemen these days.

LONDON, Sept. 1 (NYT) — The Worse than that, he offends the post-game crowd at sedate old traditional English sense of balance appear to take oneself too seriously. Boycott takes himself very seriously. He is a professional, and he is dedicated to cricket.

"I don't regard myself as any different from a top golfer or a top tennis player or any of the other professionals who put a lot of thought and application into their sport," he said as he sat boldly in the Marylebone club's paytlinn, where a miner's son would oot presume to enter unless he hap-pened to be a star player.

He knows that the old amateurs do not hold him in much esteem. He takes comfort in the knowledge that, as a 37-year-old senior player, he is not alone. The game is attracting many more gifted young profes-sionals these days, including a number of black and brown immigrants from former British colo-nies. All of the major English teams

nnw pay their players.

Some of the immigrants playericket with the same exuberance. dedication and single-mindedness as Boycott. If there is a difference, it is that the immigrants laugh more easily. The Yorkshireman, although warm in his private dealings, puts off some people because he is al-ways stolid at bat and angrily depressed in defeat. He is not an easygoing man.

Impossible Goal

"I try and tell myself to aim for perfection," he once told an report-er. "Aod I say in myself, "You'll never achieve it, you know - never. Not once in your life will you ever achieve perfection, It is impossible."

But he produces runs in great abundance, and the fans love it. He responds to the new, noisy crowds who so annoy the silently enthusi-astie old-timers. Cricket has not changed so much that a player would argue with an umpire or behave unsportingly on the field, but unsporting behavior in the stands is now common.

Three young drunks were arrested in Lord's stands the other day, one for running onto the field to try to share his beer with Geoff Boy-

Boycott smiled as he remembered the incident, "That kind of thing happens all the time," he said, "My best support comes from the ordinary public, from people like that"

The never been thought of too highly by the people who run the game," he said, not with malice but with the Yorkshireman's matter-offactness when speaking of the peculiar ways of the London gentry.

us a player, hut on other things, ..." He turned his strong right hand, the hand that has won countless matches for Yorkshire and for England, in a kind of shrug. "Yorkshire is the only county in England that requires you to be born in the county to play for the county club. Yorkshiremen are steeped in cricket. There have been fathers who so desperately wanted their sons to play for Yorkshire that they rushed their pregnant wives across the county line to make sure the babies were born

'friendly' matches they have here in the south. We play to win io Yorkshire." That is what Boycutt admires

about U.S. professionals. "They like people with talent and ability in America, dnn't they? They like winners."

golf or tennis if there were no such thing as cricket. Mulling over that

Late Streak Possible Reviving Yankees Down Orioles, 6-2

TUD.

By Thomas Boswell

BALTIMORE, Sept. 1 (WP) -As September, the month of baseball miracles, begins, the New York Yankees are perfectly poised for one of the great stretch runs in their history.

As the Yanks won their seventh straight game last night, gliding past the Baltimore Orioles, 6-2, the millinnaire world champions were racehorse alert

The words "And bere they come!" seemed to hang in the muggy Memorial Stadium air, the Yanks, faithful to their heritage. are ooce more mercilessly, almost drably, efficient. Watch out.

"No one thinks we are in a pen-nant race," said a smiling Graig Nettles, "except us."

Since July 18. New York has ground down the Boston Red Sox' ead from 14 games to 61/2. More important, the Yanks have cured their athletic delirium

tremens since the day Billy Martin was temporarily retired as mana-ger. Bob Lemnu, the ocw manager, has fullowed the simplest strategy: "Put our best team on the field — the team I watched win the pennant in 1976 and 1977 - and leave them alone.

Billy the Kid built a superb baseball machine with his crafty brain, then threw the monkey wrench of his combative personality into its gears. Lemon has those gears meshing and grinding again, as the Yanks have played 694 ball since that mid-July nadir, with a 25-11 mark under the laid-back Lemon.

Luck finally seems to have rediscovered the Yankee dugout. "Our starting lineup's finally healthy,"

on to grab the pitching Triple Crown of victories, ERA and strikeouts, reported yesterday that he probably would oot miss a turn after being smashed in the ankle by a flying bat the night before. "I broke that left ankle three

times as a kid," Guidry said. "I got skinny ankles like a racehorse. I figured if I'd broken it again, they'd have had to shoot me."

final-day caricatures of the Martin era with Thurman Munson in right and Reggie Jackson on the beach. Mickey Rivers, dancing off third with the game tied, 2-2, in the sixth, drew a pickoff throw from Scott McGregor.

Rivers kicked the ball out of

Doug DeCinces' glove, then fled home to score the winning run in a cyclooe of dust as the ball rolled no marshall as Minnesota defeated more than 20 feet from third. The Yanks pressured the Orioles' miserable outfield defense all night and took extra bases sinfully.

Slow-footed Cliff Johnsoo precipitated an error on an outfield throw. Even slower Lou Piniella. who also hit a solo homer, ehallenged Larry Harlow's arm - and won - setting op an extra Yank

want to keep the apartment.

"Whose apartment is it?" "It was originally my apartment, but as far as she's concerned it's ours. Why should I give up the apartment just because I don't want to live with her any more?"

"I know apartments are hard to find, Harlequin, hut I'm oot a lawyer. When you start talking about property settlements you should seek legal counsel."

"It won't work. When you married people want a divorce, each of you hires a lawyer to thrash things out. Lawyers don't want to have anything to do with single people

who are breaking up."
"Why don't you just tell Saralee that you don't want to live with her any more and you want her to get

"You don't know Saralee. She looks like a lamb, hut she fights like a tiger. She'd throw all my stuff out the window."
"But didn't you have some un-

derstanding when you moved in together? That if either party want-ed to call it quits there would be no hard feelings?"

"Of course we did. All singles say the same thing. But after you live together for three or four years the vows don't mean anything. The one who is rejected acts worse than the victim of a divorce."

"ft's funny," f said, "I thought the singles life was all cream and strawberries."

"Boy, you are dumb," Harlequin said, "I've put up with fits of jealousy that no married man would stand for. When you're married you can at least flirt around with somebody and the other part-ner doesn't get too shaken up if you don't make a big deal of it. But when you're living with somebody, if you so much as dance with another person, your roomie makes your life miserable, I'm too young to be stuck with one woman," he

said, practically in tears. I didn't know how to console him. "Look, this is a crazy idea, but why don't you marry Saralce?" What would that accomplish?"

he screamed at me. "Once you're married you can ask her for a divorce and then turn the whole problem over to your

He kissed me on the head and said, "I knew you'd come up with a solution. I'll go out and huy the wedding band today."

MARY RLIME

Peter Gill's Sure Grasp of Strangeness

L ONDON (IHT) — Americans, so fulsome in their praise of British theater, neglect to praise the theaters themselves. warm and welcoming whether they are old-fashioned Shaftesbury Avenue style, the new National Theatre complex or such attractive conversions as the Round House and Riverside Studios in Hammersmith.

Riverside, in only a year, has become London's most interesting new arts center. It is headed by Peter Gill, a rapid-gestured and resourceful director, playwright, teacher and former actor. "Being a director seemed the way of doing the most in the eater." he says, "of heing in contact with most of it."

Gill was long connected with the Royal Court in London and has mounted productions in Zurich, Stratford, Ontario, and at Lincoln Center. He contrived an outstanding trilogy of D.H.
Lawrence works and his play.
"Small Change," was revived to
his surprise at this year's Edinburgh Festival. "Both as a writer
and director," the playwright
Christopher Harmton has said Christopher Hampton has said. "he has an unerring eye for illu-minating detail and no one has a surer grasp of the strangeness of

Last January Gill put on his first production at the Riverside: "The Cherry Orchard" with a slightly known cast. Shortly after, Peter Hall's all-star pro-duction of the same play opened at the National Theatre. The concensus was that Gill had

won, hands down. "It was a very bold play to do in this space because it's a proscenium play, and that was exciting and challenging," he says. "It was a spacious production and f think it was fairly funny. I think it was rather revolutionary because it was very clear."

Next Wednesday Gill's sec-ond production opens: Middleton and Rowley's difficult Jaco-bean drama, "The Changeling," with an unknown cast from Gill's theater workshop, costumes by two designers fresh out of school and an actress who has played only once before in the fearfully demanding role of Bea-trice. Again, by chance, Gill is competing with the hig time:

baby asleep in a pram. The evening ended at 1 a.m. may be the most talked about events at Riverside Studios, but they are only a part of the center's extraordinary range of activities. Open from 11 a.m., it serves good food at all hours and has art shows, children's pro-grams on Sunday afternoons, foundry, then a televisinn studio and was converted to its present films (it would be possible to see design by architect Michael Reardon. "Seven Brides for Seven Brothers" and "The Changeling" right after), dance and music. The opening weekend, in May, 1976, included the London Contempo-Borough Council, which owned the lease formed a trust to administer the building as an arts center in 1975. Among the trusrary Dance Theatre, Gill's work-shop production of "As You Like ft," films by John Ford and Godard, the Jaye Consort of tees was Peter Gill, a Ham-mersmith resident. Although Riverside receives aid from the Arts Council and the Greater Viols, and Hammersmith's Big-London Council, its impetus and gest Picture, painted by visitors under the direction of Patrick one third of its budget, or \$120,000, comes from Ham-mersmith Borough Council Procktor. Alec McCowan began his readings from the Gospel of

Saint Mark on Sundays at the Riverside Studios. Last spring, after a performcal and personal and undogmatic. "We do a lot of things I can't stand," he says. "But one of the things one learns is that if one only did what one likes, one would get nothing done." He works with a certain economy and confidence: "I don't think it's good pussyfooting around if you're doing this sort of thing," He has been criticized by lo-

cals for his programming - "People say what has art to do with ordinary people?"

"I think Planchon put it very well: All you can do is keep the wound open. Having art going on near the people is better than not having it go on. It is a stah."

An Alternative

in theatrical terms, he does not like to be considered fringe or the equivalent of off-Off Broadway. "If you like, what we stand for is an alternative to the alternative. There is the idea that the National Theatre and the Royal Shakespeare supply the need and that the other thing is theatrical bingo. I think our society is more complicated. Our production of a play may not be a good one, but it will not he an English classic done by the Royal Shakespeare or by a group of people who saw La Mama and read Grotowski."

Gill does not think there should be any conflict between artistic quality and community service: "If we put on something interesting, we'll get people com-ing over from Paris. I don't think

that's bad for Hammersmith.
"This is an art center principally for Hammersmith. It can't be a place for people who come for fingerpainting — Ham-mersmith is the size of a city like Leicester, after all. With a large community, you're into a differ-ent way of serving the communi-

"Hammersmith ranges from high-rise estates to gentrified Fulham: What is good about it is that it doesn't fit into any color supplement view of a London village. It is not a merrie cockocyfied village.

"If we served it adequately, and we don't," Peter Gill says, "we would solve the world's

DOMESTIC SITUATIONS WANTED

PEOPLE: Solzhenitsyn Stepson Fined on Driving Charge

Soviet author Alexander Solzhen-itsyn has been fined \$50 for a motor vehicle violation in Vermont. Court officials said that Dimitri Turin pleaded guilty in Vermoot District Court earlier this week on a charge of "unsafe starting." The charge stemmed from an incident at a Ludlow, Vt., shopping center. Court employees said that Turin's mother, Natalya Solzhenitsyn, appeared in court with her son by a previous marriage. The Solzhenitsyns now live on a secluded estate in Cavendish, Vt. Turin originally was charged on Aug. 22 by Ludlow police with careless and negligent driving and disorderly conduct. Police said that he drove out of a shopping center parking lot with his tires screeching and oearly struck another vehicle. The disorderly conduct charge was later dropped and the careless and negligeni driving charge was reduced to

the man seated at the luncheonette table in Florida looked like a typical tourist - baseball cap, no shirt and camera slung over his shoulder. She told him that the Key Biscayne luncheonette had a policy against serving shirtless patrons. The man said he was sorry and stood up, whereupon Miss Williams realized he not only had no shirt — he was wearing nothing but the cap and the camera. None of the other customers, sipping coffee and reading newspapers, had noticed. Not until the nude man had visited several other stores in the shopping center did police find him and arrest him for indecent exposure. Police iden-tified him as Owen Hernandez, an unemployed dishwasher who, they said, decided while swimming at a nearby beach to go for a spin on his hicycle in the nude.
